**BAS40-04LT1** 

Preferred Device

# **Dual Series Schottky Barrier Diode**

These Schottky barrier diodes are designed for high speed switching applications, circuit protection, and voltage clamping. Extremely low forward voltage reduces conduction loss. Miniature surface mount package is excellent for hand held and portable applications where W.DZSC.COM space is limited.

- Extremely Fast Switching Speed
- Low Forward Voltage

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.
