Professional Line of Digital Clamp-on Meters (AC60, AC65, AC68, AC71, AC75, AD105)

Meterman's line of clamp-on meters continues to be a popular choice of electrical and HVAC professionals. These meters are designed for electrical contractors, electricians, HVACR installers and servicers, as well as commercial building and industrial plant maintenance personnel and electrical shops. People who demand value, good quality and practical test equipment for their everyday use. Five models and measurement capabilities to choose from.

AC75 - NEW

The AC75 combines a clamp meter, a multimeter, and a thermometer into one meter. The AC75 is designed for electrical and HVAC work. The AC75 has a Type K digital thermometer, a high capacitance range, and display backlight. The extra features of the AC75 enable more specialized troubleshooting.

AC 71 - NEW

The AC71 is an automatic digital clamp multimeter with two additional unique features: AutoTect™ measurement and automatic backlight. The AutoTect™ feature automatically senses what type of measurement is being made when the test leads are placed across a measurement point. The automatic backlight turns itself on when it senses a dim viewing work area.

AC60

The AC60 is a durable AC clamp multimeter with a safe hand guard design

AC65

The AC65 is a true RMS AC clamp multimeter. It measures non-linear load current.

AC68

The AC68 has additional features such as frequency combined with both AC and DC current measurement.

The right tool, everyday.™

AD105

The AD105 True rms ammeter measures non-linear loads to 1000 Amps. Measures both AC and DC Current. It has the widest range of current measurement of all the Meterman clamp meters.
