SN74LVC4245A OCTAL BUS TRANSCEIVER AND 3.3-V TO 5-V SHIFTER WITH 3-STATE OUTPUTS

SCAS375D - MARCH 1994 - REVISED JUNE 1998

- EPIC™ (Enhanced-Performance Implanted CMOS) Submicron Process
- 3.3-V to 5-V Bidirectional Level Shifter
- Latch-Up Performance Exceeds 250 mA Per JESD 17
- Package Options Include Plastic Small-Outline (DW), Shrink Small-Outline (DB), and Thin Shrink Small-Outline (PW) Packages

description

This 8-bit (octal) noninverting bus transceiver contains two separate supply rails; B port has V_{CCB} , which is set at 3.3 V, and A port has V_{CCA} , which is set at 5 V. This allows for translation from a 3.3-V to a 5-V environment, and vice versa.

The SN74LVC4245A is designed for asynchronous communication between data buses. The device transmits data from the A bus to the B bus or from the B bus to the A bus, depending on the logic level at the direction-control (DIR) input. The output-enable (\overline{OE}) input can be used to disable the device so the buses are effectively isolated.

The SN74LVC4245A pinout allows the designer to switch to a normal all-3.3-V or all-5-V 20-pin '245 device without board re-layout. The designer uses the data paths for pins 2–11 and 14–23 of the SN74LVC4245A to align with the conventional '245 pinout.

The SN74LVC4245A is characterized for operation from -40°C to 85°C.

FUNCTION TABLE

INP	UTS	OPERATION			
OE	DIR	OPERATION			
L	L	B data to A bus			
L	Н	A data to B bus			
Н	Χ	Isolation			

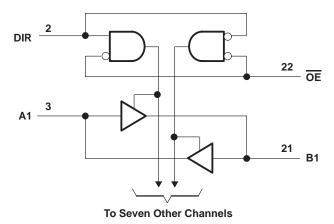

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

SCAS375D - MARCH 1994 - REVISED JUNE 1998

logic diagram (positive logic)

absolute maximum ratings over operating free-air temperature range for V_{CCA} = 5 V (unless otherwise noted) $\!\!\!^{\dagger}$

Supply voltage range, V _{CCA}	
Input voltage range, V _I : A port (see Note 1)	-0.5 V to V_{CCA} + 0.5 V
Control inputs	
Output voltage range, VO: A port (see Note 1)	0.5 V to V _{CCA} + 0.5 V
Input clamp current, $I_{IK}(V_I < 0)$	
Output clamp current, I _{OK} (V _O < 0)	
Continuous output current, I _O	±50 mA
Continuous current through each V _{CCA} or GND	±100 mA
Package thermal impedance, θ _{JA} (see Note 2): DB package	
DW package	81°C/W
PW package	120°C/W
Storage temperature range, T _{stg}	

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES: 1. This value is limited to 6 V maximum.
 - 2. The package thermal impedance is calculated in accordance with JESD 51.

SCAS375D - MARCH 1994 - REVISED JUNE 1998

absolute maximum ratings over operating free-air temperature range for $V_{CCB} = 3.3 \text{ V}$ (unless otherwise noted)[†]

Supply voltage range, V _{CCB}		0.5 V to 4.6 V
Input voltage range, V _I : B port (see Note 3)		$-0.5 \text{ V to V}_{CCB} + 0.5 \text{ V}$
Output voltage range, V _O : B port (see Note 3)		$-0.5 \text{ V to V}_{CCB} + 0.5 \text{ V}$
Input clamp current, I_{IK} ($V_I < 0$)		
Output clamp current, IOK (VO < 0)		–50 mA
Continuous output current, IO		±50 mA
Continuous current through V _{CCB} or GND		±100 mA
Package thermal impedance, θ_{JA} (see Note 2):	DB package	104°C/W
	DW package	81°C/W
	PW package	120°C/W
Storage temperature range, T _{stg}		-65° C to 150° C

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

recommended operating conditions for $V_{CCA} = 5 V$ (see Note 4)

		MIN	MAX	UNIT
VCCA	Supply voltage	4.5	5.5	V
VIH	High-level input voltage	2		V
V _{IL}	Low-level input voltage		0.8	V
VI	Input voltage	0	VCCA	V
VO	Output voltage	0	VCCA	V
ІОН	High-level output current		-24	mA
l _{OL}	Low-level output current		24	mA
T _A	Operating free-air temperature	-40	85	°C

NOTE 4: All unused inputs of the device must be held at the associated V_{CC} or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

recommended operating conditions for V_{CCB} = 3.3 V (see Note 4)

			MIN	MAX	UNIT
Vссв	Supply voltage		2.7	3.6	V
VIH	High-level input voltage	V _{CCB} = 2.7 V to 3.6 V	2		V
VIL	Low-level input voltage	V _{CCB} = 2.7 V to 3.6 V		0.8	V
٧ _I	Input voltage				V
٧o	Output voltage	age			
la	High-level output current $ \frac{V_{CCB} = 2.7 \text{ V}}{V_{CCB} = 3 \text{ V}} $			-12	mΛ
IOH				-24	mA
la.	Low lovel output output	V _{CCB} = 2.7 V	12		A
IOL	Low-level output current VCCB = 3 V			24	mA
TA	Operating free-air temperature		-40	85	°C

NOTE 4: All unused inputs of the device must be held at the associated V_{CC} or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

NOTES: 2. The package thermal impedance is calculated in accordance with JESD 51.

^{3.} This value is limited to 4.6 V maximum.

PARAMETER MEASUREMENT INFORMATION (A PORT)

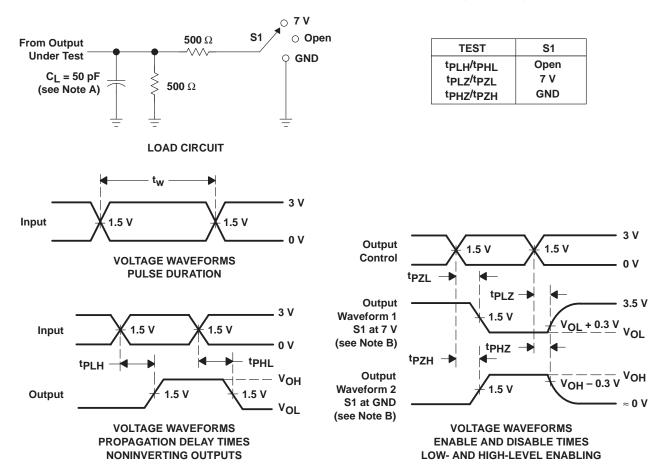

NOTES: A. C_L includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR \leq 10 MHz, $Z_Q = 50 \Omega$, $t_f \leq$ 2.5 ns. $t_f \leq$ 2.5 ns.
- D. The outputs are measured one at a time with one transition per measurement.

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH, PERSONAL INJURY, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE ("CRITICAL APPLICATIONS"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
