Quality Assurance defines Simpson Electric products in today's market. The word "quality" became Simpson's byword in the instrument industry when, in 1927, Simpson's founder, Ray Simpson, built the mechanism for the earth inductor compass; the same compass used by Charles Lindbergh when he flew the "Spirit of St. Louis" on the first non-stop solo flight across the Atlantic Ocean. For thirty-three hours, Lindbergh's life and his success depended largely on Ray Simpson's navigational instrument.
