

100mA/50V Digital Transistors

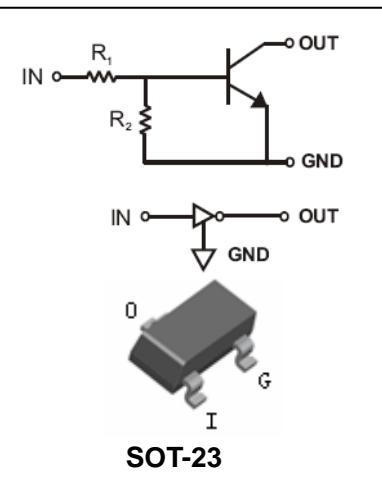

DTC143EUA

FEATURES

- Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors.
- The bias resistors consist of thin-film resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating Parasitic effects.
- Only the on/off conditions need to be set for operation, Making the device design easy.

Lead-free

APPLICATIONS

- Inverter, Interface, Driver.
- The NPN style digital transistor.
