Pre-Printed Wire & Cable Markers

K-Type® cable markers

K-Type® markers are used to identify wire bundles, cables, pipes and conduits using specially designed oval shaped, individual characters that slide on to a PVC carrier, which is then attached to the substrate using cable ties. K-Type® markers are ideal for post termination applications or where retrofit is anticipated.

These markers are supplied yellow with black legends and in the standard International colour code option and are supplied on reels. K-Type® markers come in one standard size to fit carrier strips that can hold from 7 to 18 markers and are made from a plasticized PVC material.

Features and benefits

■ Versatile marking system for cables , cable bundles and conduit.

■ Elliptical marker profile allows easy fitting to carrier strips.

Temperature rating		
Operating temperature range	−40°C to +70°C	−40°F to +158°F
