

TechPump Bottles

1980, 1981, 1982

Introduction

TechPump bottles are designed for precision control and dispensing of solvents in electronic and laboratory environments. The distinctive pumping mechanism combined with a high density polyethylene (HDPE) bottle makes a complete unit ready for use with a broad range of cleaning solvents. The dish-type pump dispenser allows for a clean, one-handed operation, which prevents the use of excessive solvent and keeps contaminants from entering the container. The pump includes a hinged lid to keep out impurities while the container is not in use and stainless steel parts to facilitate the use of aggressive solvents. Precision valve seals contents to reduce vapor and product loss. To insure total purity, the unit is shipped with a celon band sealing the pump head.

Chemical Components

This product does not contain any hazardous ingredients as per OSHA 29 CFR 1910.1200 Subpt.(z).

Environmental Policy

Techspray® is committed to developing products to ensure a safer and cleaner environment. We will continue to meet and sustain the regulations of all federal, state and local government agencies.
