# FMS6418B

## Triple Video Driver with Selectable HD/SD Video Filters for RGB, YUV or YPbPr Signals

### Features

- Three video anti-aliasing or reconstruction filters
- YUV/RGB/YPbPr signal support
- 2:1 MUX inputs for multiple RGB/YUV/YPbPr inputs
- Selectable 8MHz or 32MHz 6th order filters for SD/HD applications
- DC coupled input, AC coupled output
- All outputs can drive AC coupled 150Ω loads and provide 6dB of gain
- 0.6% differential gain with 0.15° differential phase
- 36dB/octave roll-off on all channels
- Lead (Pb) Free packages - SOIC-16 or TSSOP-14

### Description

The FMS6418B offers comprehensive filtering for set-top box or DVD applications. This part consists of a triple 6th order filter with selectable 32MHz or 8MHz frequencies.

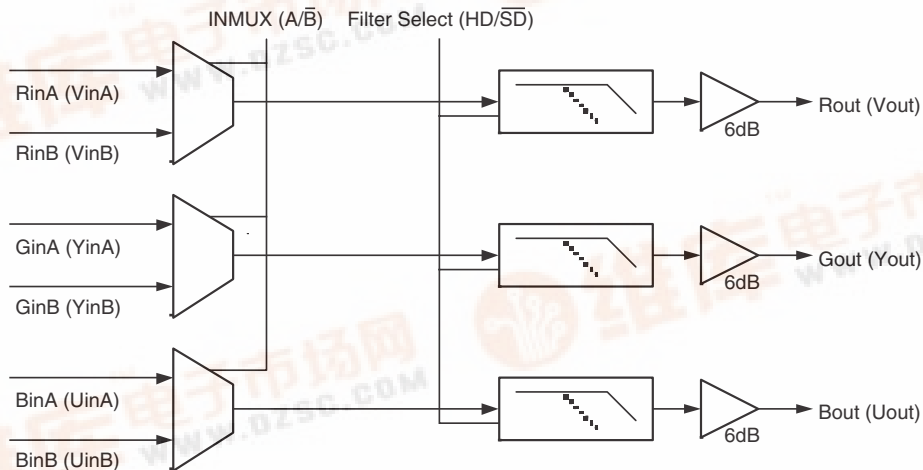

A 2-to-1 multiplexer is provided on each filter channel. The triple filters can accommodate either YUV, RGB, or YPbPr signals. All channels accept DC coupled ground-referenced 1V signals. The filters provide 2V<sub>pp</sub> signals into AC coupled terminated loads. The low-pass filters are powered by 3.3V and the outputs by 5.0V.

The FMS6418B is available in both 16-pin SOIC and 14-pin TSSOP packages.

### Applications

- Cable set-top boxes
- Satellite set-top boxes
- DVD players
- HDTV
- Personal Video Recorders (PVR)
- Video On Demand (VOD)

### Functional Block Diagram

FMS6418B Triple Video Driver with Selectable HD/SD Video Filters for RGB, YUV or YPbPr Signals

## Pin Configurations

## Pin Assignments

TSSOP-14	SOIC-16	Pin Name	Description	Equivalent Circuit
1	1	IN <sub>MUX</sub>	Logic input selects between channel <A> or <B> of the RGB inputs. (1): RGB A input, (0): RGB B input	
14	16	F <sub>SEL</sub>	Logic Input selects between (0) SD (8MHz) and (1) HD (32MHz) filters	
2	2	R <sub>INA</sub>	Analog RED video input - Channel A	
3	3	R <sub>INB</sub>	Analog RED video input - Channel B	
4	4	G <sub>INA</sub>	Analog GREEN video input - Channel A	
5	5	G <sub>INB</sub>	Analog GREEN video input - Channel B	
6	6	B <sub>INA</sub>	Analog BLUE video input - Channel A	
7	7	B <sub>INB</sub>	Analog BLUE video input - Channel B	
N/A	8	NC	No Connect (float pin)	
8	9	V <sub>CCA</sub>	+3.3V power supply for filters	
9	10	V <sub>CCO</sub>	+5V power supply for output buffers	
10	11	B <sub>OUT</sub>	Filtered Analog BLUE video output from either B <sub>INA</sub> or B <sub>INB</sub>	
11	12	G <sub>OUT</sub>	Filtered Analog GREEN video output from either G <sub>INA</sub> or G <sub>INB</sub>	
12	13	R <sub>OUT</sub>	Filtered Analog RED video output from either R <sub>INA</sub> or R <sub>INB</sub>	
N/A	14	V <sub>SSO</sub>	Ground for output buffers	
N/A	15	V <sub>SSA</sub>	Ground for filters	
13	N/A	V <sub>SS</sub>	Ground

## General Description

The FMS6418B offers comprehensive filtering for set top box or DVD applications. This part consists of a triple 6th order filter with selectable 32MHz or 8MHz frequencies. A 2-to-1 multiplexer is provided on each filter. The filters are intended for either YUV, RGB, or YPbPr signals. All channels accept DC coupled ground-referenced 1V signals. The filters provide  $2V_{pp}$  signals into AC coupled terminated loads. All channels provide 6dB gain, except 1V ground referenced inputs, and drive AC coupled loads. The low-pass filters are powered by 3.3V and the output buffers are powered by 5.0V.

The FMS6418B is a next generation filter solution from Fairchild Semiconductor addressing the expanding filtering needs for set top boxes, and DVD players. The product provides selectable filtering with cutoff frequencies of 32MHz or 8MHz on the RGB/YUV/YPbPr channels. Thus, the FMS6418B addresses the requirement for a single set top box to be compatible with a variety of resolution standards. Multiplexers on the RGB channels provide further flexibility. For DVD, set-top box, and TV applications, the product provides filtering and output drive amplification for three channels of outputs (RGB/YUV/YPbPr).

## Applications

### DC Levels

At any given time, the input signal's DC levels must be between 0.0V and 1.3V to utilize the optimal headroom and to avoid clipping on the outputs.

### Single Supply +5V Operation

For low power consumption, the FMS6418B was designed to operate off of 5V and 3.3V.  $V_{CCA}$  can be operated from 5V instead of 3.3V and still meet specifications, except power consumption. When the 3.3V supply is increased to 5V, the typical current consumption increases by 5mA. The net effect is the part dissipates an additional 22 percent of power.

### Driving the Digital Pins with 3.3V or 5V Logic

Either is allowed as long as the  $V_{IH}$  and  $V_{IL}$  are adhered to.

**NOTES:**

- All dimensions are in millimeters (angle in degrees).
- Dimensioning and tolerancing per ASME Y14.5-1994.
- Dimensions "D" does not include mold flash, protusions or gate burrs. Mold flash protusions or gate burrs shall not exceed 0.15 per side.
- Dimension "E1" does not include interlead flash or protusion. Interlead flash or protusion shall not exceed 0.25 per side.
- Dimension "b" does not include dambar protusion. Allowable dambar protusion shall be 0.08mm total in excess of the "b" dimension at maximum material condition. Dambar cannot be located on the lower radius of the foot. Minimum space between protusion and adjacent lead is 0.07mm for 0.5mm pitch packages.
- Terminal numbers are shown for reference only.
- Datums  $\square A$  and  $\square B$  to be determined at datum plane  $\square H$ .
- Dimensions "D" and "E1" to be determined at datum plane  $\square H$ .
- This dimensions applies only to variations with an even number of leads per side. For variation with an odd number of leads per side, the "center" lead must be coincident with the package centerline, Datum A.
- Cross sections A – A to be determined at 0.10 to 0.25mm from the leadtip.
