

# DUAL DIFFERENTIAL PSEUDO-ECL TO ECL TRANSLATORS AND DUAL DIFFERENTIAL ECL TO PSEUDO-ECL TRANSLATORS

SDNS005B – SEPTEMBER 1993 – REVISED OCTOBER 1995

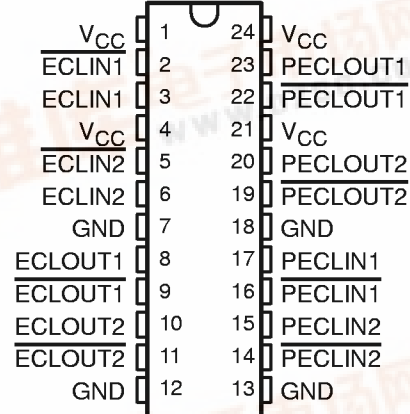

- Dual ECL to Pseudo-ECL and Pseudo-ECL to ECL Translators
- Single 5-V Power Supply
- Advanced BiCMOS Technology
- Typical Application: Interface Between an ECL-Level Optical Transmitter and a Pseudo-ECL-Output Level Parallel-to-Serial Converter
- Packaged in 24-Pin Plastic Small-Outline Package

## description

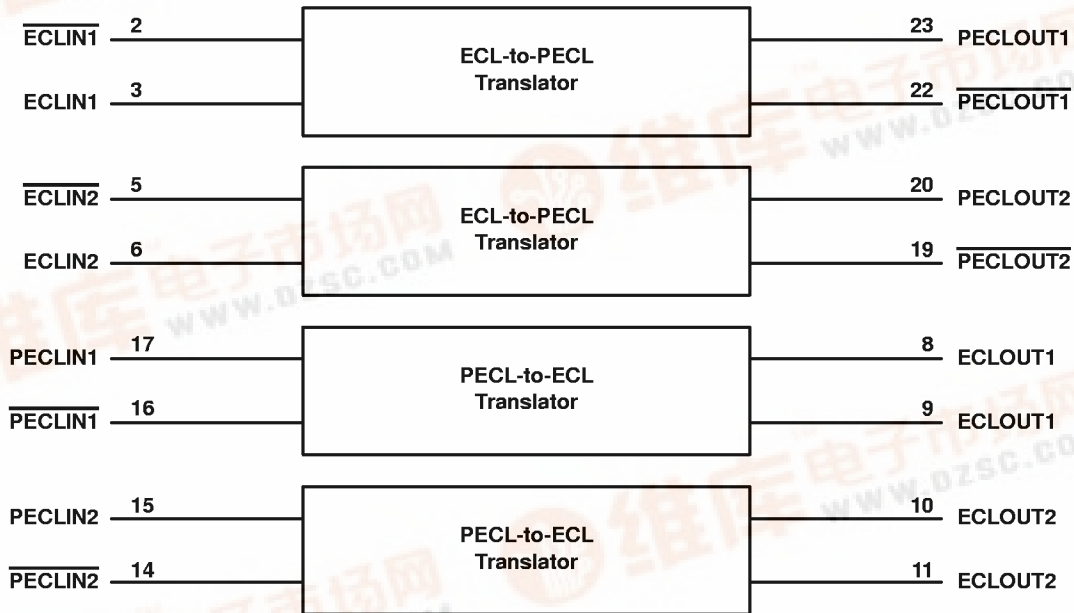

The TNETA1545 provides four buffers. Two buffers for two differential ECL-input signals referenced to GND are translated to differential pseudo-ECL (PECL) outputs referenced to 5 V instead of GND.

Two buffers for two differential PECL-input signals referenced to 5 V instead of GND are translated to differential ECL outputs referenced to GND.

DW PACKAGE

## DUAL DIFFERENTIAL PSEUDO-ECL TO ECL TRANSLATORS AND DUAL DIFFERENTIAL ECL TO PSEUDO-ECL TRANSLATORS

SDNS005B – SEPTEMBER 1993 – REVISED OCTOBER 1995

### Terminal Functions

| TERMINAL NAME         | NO.        | I/O | DESCRIPTION   |
|-----------------------|------------|-----|---|
| ECLIN1,<br>ECLIN1     | 3,<br>2    | I   | ECL-compatible inputs for ECL-to-PECL translator    |
| PECLOUT1,<br>PECLOUT1 | 23,<br>22  | O   | PECL-compatible outputs from ECL-to-PECL translator |
| ECLIN2,<br>ECLIN2     | 6,<br>5    | I   | ECL-compatible intpus for ECL-to-PECL translator    |
| PECLOUT2,<br>PECLOUT2 | 20,<br>19  | O   | PECL-compatible otuputs from ECL-to-PECL translator |
| PECLIN1,<br>PECLIN1   | 17,<br>16  | I   | PECL-compatible inputs fro PECL-to-ECL translator   |
| ECLOUT1,<br>ECLOUT1   | 8,<br>9    | O   | ECL-compatible outputs from PECL-to-ECL translator  |
| PECLIN2,<br>PECLIN2   | 15,<br>14  | I   | PECL-compatible inputs for PECL-to-ECL translator   |
| ECLOUT2,<br>ECLOUT2   | 10,<br>11  | O   | ECL-compatible outputs from PECL-to-ECL translator  |
| GND                   | 7,12,13,18 |     | Ground (0-V reference)                              |
| V <sub>CC</sub>       | 1,4,21,24  |     | Supply voltage                                      |

### absolute maximum rating over operating free-air temperature range (unless otherwise noted)†

|  |                  |
|--|------------------|
| Supply voltage range, V <sub>CC</sub> (see Note 1)   | –0.5 V to 7 V    |
| Input voltage range: ECL                             | –2.5 V to 0 V    |
| PECL   | 0 V to 7 V       |
| Operating free-air temperature range, T <sub>A</sub> | –40° C to 85° C  |
| Storage temperature range, T <sub>stg</sub>          | –65° C to 150° C |

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: All voltage values are with respect to GND.

### recommended operating conditions

|                 |                                | MIN               | NOM                    | MAX                    | UNIT |
|-----------------|--------------------------------|-------------------|------------------------|------------------------|------|
| V <sub>CC</sub> | Supply voltage                 | 4.75              | 5                      | 5.25                   | V    |
| V <sub>IH</sub> | High-level input voltage       | ECL (see Note 2)  |                        | –0.88                  | V    |
|                 |                                | PECL (see Note 2) | V <sub>CC</sub> –1.165 | V <sub>CC</sub> –0.88  |      |
| V <sub>IL</sub> | Low-level input voltage        | ECL (see Note 2)  | –1.81                  | –1.475                 | V    |
|                 |                                | PECL (see Note 2) | V <sub>CC</sub> –1.81  | V <sub>CC</sub> –1.475 |      |
| T <sub>A</sub>  | Operating free-air temperature | –40               |                        | 85                     | °C   |

NOTE 2. The algebraic convention, in which the least positive (most negative) value is designated minimum, is used in this data sheet for logic-level voltages only.

## **IMPORTANT NOTICE**

Texas Instruments (TI) reserves the right to make changes to its products or to discontinue any semiconductor product or service without notice, and advises its customers to obtain the latest version of relevant information to verify, before placing orders, that the information being relied on is current.

TI warrants performance of its semiconductor products and related software to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("Critical Applications").

**TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, INTENDED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT APPLICATIONS, DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS.**

Inclusion of TI products in such applications is understood to be fully at the risk of the customer. Use of TI products in such applications requires the written approval of an appropriate TI officer. Questions concerning potential risk applications should be directed to TI through a local SC sales office.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards should be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein. Nor does TI warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used.
