Vishay Semiconductors

## Optocoupler with Phototransistor Output

### Features

- CTR offered in 9 Groups
- Isolation materials according to UL94-VO
- Pollution degree 2 (DIN/VDE 0110 / resp. IEC 664)
- Climatic classification 55/100/21 (IEC 68 part 1)
- Special construction: Therefore, extra low coupling capacity of typical 0.2 pF, high **Common Mode Rejection**
- Low temperature coefficient of CTR
- Temperature range - 40 to + 110 °C
- Coupling System U
- Rated impulse voltage (transient overvoltage)  $V_{IOTM} = 8 \text{ kV}_{\text{peak}}$
- Isolation test voltage (partial discharge test voltage)  $V_{pd} = 1.6 \text{ kV}$
- Rated isolation voltage (RMS includes DC)  $V_{IOWM} = 600 \text{ V}_{\text{RMS}}$  (848  $V_{\text{peak}}$ )
- Rated recurring peak voltage (repetitive)  $V_{IORM} = 600 \text{ V}_{\text{RMS}}$
- Creepage current resistance according to VDE 0303/IEC 112 **Comparative Tracking Index: CTI**  $\geq 175$
- Thickness through insulation  $\geq 0.75 \text{ mm}$
- Internal creepage distance  $> 4 \text{ mm}$
- External creepage distance  $> 8 \text{ mm}$

### Agency Approvals

- BSI: EN 60065:2002, EN 60950:2000 Certificate number 7081 and 7402
- FIMKO (SETI): EN 60950:2000 Certificate number FI 18973
- Underwriters Laboratory (UL) File number E 76222
- VDE IEC 60747 Certificate number 115667

### Applications

Circuits for safe protective separation against electrical shock according to safety class II (reinforced isolation):

- For appl. class I - IV at mains voltage  $\leq 300 \text{ V}$

- For appl. class I - III at mains voltage  $\leq 600 \text{ V}$  according to VDE 0884, table 2, suitable for:

**Switch-mode power supplies, line receiver, computer peripheral interface, microprocessor system interface, with operating temperature up to 110°C**

### Description

The TCET111.(G) consists of a phototransistor optically coupled to a gallium arsenide infrared-emitting diode in a 4-lead plastic dual inline package.

The elements are mounted on one lead frame using a **coplanar technique**, providing a fixed distance between input and output for highest safety requirements.

### VDE Standards

These couplers perform safety functions according to the following equipment standards:

#### VDE 0884 / IEC 60747:2003

Optocoupler for electrical safety requirements

#### IEC 60950

Office machines (applied for reinforced isolation for mains voltage  $< 400 \text{ V}_{\text{RMS}}$ )

#### VDE 0804

Telecommunication apparatus and data processing

#### IEC 60065

Safety for mains-operated electronic and related household apparatus

## Absolute Maximum Ratings

$T_{amb} = 25\text{ }^{\circ}\text{C}$ , unless otherwise specified

Stresses in excess of the absolute Maximum Ratings can cause permanent damage to the device. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to absolute Maximum Rating for extended periods of the time can adversely affect reliability.

## **Ozone Depleting Substances Policy Statement**

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

**Vishay Semiconductor GmbH** has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

**Vishay Semiconductor GmbH** can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

**We reserve the right to make changes to improve technical design  
and may do so without further notice.**

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
