Liquid Crystal Displays

LIQUID CRYSTAL DISPLAYS
(STANDARD PRODUCTS)

■ FEATURES

- Easy on the eyes due to the non-radiating display
- Low power consumption
- Variety of display patterns
- High contrast and wide viewing angle
- High reliability
- Pin type LCDs are available for easy mounting

■ STANDARD SPECIFICATIONS

- (1) Driving method
 - Static ● Operating voltage: 3.0V
- (2) Environmental condition
 - Operating temperature range: -10°C to $+60^{\circ}\text{C}$
 - Storage temperature range: -20°C to $+60^{\circ}\text{C}$
- (3) Connector
 - Rubber (zebra) connector type or pin type
- (4) Viewing angle ● 6 o'clock
- (5) Polarizer ● Normal color ● Reflective type

■ OPTION

- (1) Environmental condition
 - (Wide temperature range: High reliability type)
 - Operating temperature range: -30°C to $+80^{\circ}\text{C}$
 - Storage temperature range: -40°C to $+85^{\circ}\text{C}$
- (2) Viewing angle
 - 12 o'clock
- (3) Polarizer
 - Color: Gold, Red, Blue, Green
 - Type: Transmissive, Transflective

Notes: The values may be different by LCD size.

The table above is applied to SP516 size LCD or larger.

We will present you the reliability test report on your request.

HANDLING INSTRUCTIONS

Safety

- If the LCD panel breaks, do not allow the liquid crystal to get in your mouth. If the liquid crystal touches your skin or clothes, wash it off immediately with soap and water.

Handling

- Keep static electricity away from the CMOS LSI. (LCD module)
- Since the LCD panel is made of plate glass, do not apply mechanical shocks or press hard on it.
- The polarizer on the front of the display is easily scratched. Handle with care.
- Do not remove the panel or frame from the liquid crystal display module. (LCD module)
- Do not soil or damage LCD panel terminals.
- Keep the display surface clean. Do not touch it with your skin.

Storage

- Store in a dark place at $25^\circ\text{C} \pm 10^\circ\text{C}$ and 65% RH maximum.
- Do not store where there are organic solvents or corrosive gases.
- Do not crush, vibrate, or jolt the module or its components.

Cleaning the Panel

- Do not wipe with a dry cloth, as it may scratch the polarizer.
- Wipe gently with a soft cloth soaked in a petroleum benzene.
- Do not use ketone (methylethyl ketone, acetone) or aromatic (toluene, xylene) solvents, as they dissolve or damage the polarizer.
