The SIL10E series are non-isolated DC/DC converters packaged in a single-in-line footprint giving designers a cost effective solution for conversion from either a 5V or a 3.3V source. The SIL10E offers a range of fixed outputs and one wide trim output unit at an industry leading 10A which allows maximum design flexibility and a pathway for future upgrades. The SIL10E is designed for applications that include distributed power, workstations, optical network and wireless applications. Implemented using state of the art surface mount technology and automated manufacturing techniques, the SIL10E offers compact size and efficiencies of up to 95%.

### Part Number System with Options

### Notes

- 1 Referenced to ground for shutdown. If pin 6 is high unit will shutdown. If pin 6 is open unit will operate as normal. Converter is guaranteed OFF when control pin is greater than 1.2V.
- 2 Full de-rating curves available in both the Long Form Data Sheet and Application Note 134.
- 3 For certain applications that use low ESR capacitors on the output of the converter and to insure maximum converter stability, please add the suffix '02' to the model, e.g. SIL10E-05S2V5-V02.

**CAUTION: High internal temperatures. Ensure that unit is not user accessible.**
