Features

- ✕ Octave Bandwidth Operation
- ✕ +17 dBm Output Power
- ✕ -35 dBc Fundamental Leakage
- ✕ +5.0V, 125mA Bias Supply
- ✕ SMD, 4x4 mm QFN Package
- ✕ RoHS Compliant
- ✕ 100% RF, DC and Output Power Testing

General Description

Mimix Broadband's 2.5-6.0/5.0-12.0 GHz SMD Active Doubler delivers + 17 dBm of output power. The device combines an active doubler with an output buffer amplifier that delivers constant power over a range of input powers. The device has excellent rejection of the fundamental and harmonic products and requires a single positive bias supply. This device uses Mimix Broadband's 2 um GaAs HBT device model technology to ensure high reliability and uniformity. The device comes in a low-cost 4x4 mm QFN Surface Mount Plastic Package offering excellent RF and thermal properties and is RoHS compliant. This device is well suited for Point-to-Point Radio, Microwave, LMDS, SATCOM and VSAT applications.

Absolute Maximum Ratings

| | |
|----------------------------|--------------------------------|
| Supply Voltage (Vcc) | +6.0 VDC |
| Supply Current (Id) | 200 mA |
| Input Power (RF Pin) | +10.0 dBm |
| Storage Temperature (Tstg) | -65 to +165 °C |
| Operating Temperature (Ta) | -55 to MTTF Table ¹ |
| Junction Temperature (Tj) | MTTF Table ¹ |

(1) Junction temperature affects a device's MTTF. It is recommended to keep junction temperature as low as possible for maximum life.

Electrical Characteristics (Ambient Temperature T = 25 °C)

| Parameter | Units | Min. | Typ. | Max. |
|---------------------------------|-------|------|------|------|
| Input Frequency Range (fin) | GHz | 2.5 | - | 6.0 |
| Output Frequency Range (fout) | GHz | 5.0 | - | 12.0 |
| Input Return Loss (S11) | dB | - | -15 | - |
| Output Return Loss (S22) | dB | - | -7 | - |
| Saturated Output Power (Psat) | dBm | +14 | +17 | - |
| RF Input Power (RF Pin) | dBm | -3.0 | - | +3.0 |
| Fundamental Leakage (fin) | dBc | - | -35 | - |
| Third Harmonic Leakage (3xfin) | dBc | - | -30 | - |
| Fourth Harmonic Leakage (4xfin) | dBc | - | -20 | - |
| Bias Voltage (Vcc) | VDC | - | +5.0 | +5.5 |
| Supply Current | mA | - | 125 | 140 |

App Note [1] Biasing - The device is operated by biasing $V_{cc}=5.0$ V which will draw typically 125mA and a maximum of 140mA. The device requires by-passing as shown in the recommended layout with $C1=1$ nF and $C2=1$ μF.

MTTF Tables

These numbers were calculated based on accelerated life test information and thermal model analysis received from the fabricating foundry.

| Backplate Temperature | MTTF Hours | FITs |
|-----------------------|------------|-------|
| 55 deg Celsius | 2.67E+06 | 375 |
| 75 deg Celsius | 3.01E+05 | 3321 |
| 95 deg Celsius | 4.46E+04 | 22440 |

Bias Conditions: $V_{cc}=5.0$ V, $I_{cc}=125$ mA

Handling and Assembly Information

CAUTION! - Mimix Broadband MMIC Products contain gallium arsenide (GaAs) which can be hazardous to the human body and the environment. For safety, observe the following procedures:

- Do not ingest.
- Do not alter the form of this product into a gas, powder, or liquid through burning, crushing, or chemical processing as these by-products are dangerous to the human body if inhaled, ingested, or swallowed.
- Observe government laws and company regulations when discarding this product. This product must be discarded in accordance with methods specified by applicable hazardous waste procedures.

Life Support Policy - Mimix Broadband's products are not authorized for use as critical components in life support devices or systems without the express written approval of the President and General Counsel of Mimix Broadband. As used herein: (1) Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user. (2) A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

Package Attachment - This packaged product from Mimix Broadband is provided as a rugged surface mount package compatible with high volume solder installation. The package is a low-cost plastic package. Vacuum tools or other suitable pick and place equipment may be used to pick and place this part. Care should be taken to ensure that there are no voids or gaps in the solder connection so that good RF, DC and ground connections are maintained. Voids or gaps can eventually lead not only to RF performance degradation, but reduced reliability and life of the product due to thermal stress.

Typical Reflow Profiles

| Reflow Profile | SnPb | Pb Free |
|---------------------------------|-------------------------|-------------------------|
| Ramp Up Rate | 3-4 °C/sec | 3-4 °C/sec |
| Activation Time and Temperature | 60-120 sec @ 140-160 °C | 60-180 sec @ 170-200 °C |
| Time Above Melting Point | 60-150 sec | 60-150 sec |
| Max Peak Temperature | 240 °C | 265 °C |
| Time Within 5 °C of Peak | 10-20 sec | 10-20 sec |
| Ramp Down Rate | 4-6 °C/sec | 4-6 °C/sec |

Mimix Lead-Free RoHS Compliant Program - Mimix has an active program in place to meet customer and governmental requirements for eliminating lead (Pb) and other environmentally hazardous materials from our products. All Mimix RoHS compliant components are form, fit and functional replacements for their non-RoHS equivalents. Lead plating of our RoHS compliant parts is 100% matt tin (Sn) over copper alloy and is backwards compatible with current standard SnPb low-temperature reflow processes as well as higher temperature (260°C reflow) "Pb Free" processes.
