# Switchmode/High Frequency **Common Mode Inductors**

# **CME375-1**

#### **Description:**

Highly dependable Triad common mode EMI suppression inductors are used in various types of power supplies to eliminate noise common to all lines. These units also provide effective differential mode filtering. Meeting VDE, IEC, UL and CSA requirements, they minimize AC line transmitted interference often created by high frequency switching power supplies.

#### **Construction:**

Constructed with UL rated 130°C materials.
