

Structure Silicon Monolithic Integrated Circuit  
 Product name Low voltage operation video driver with LPF

Type **BH76706GU**

Outer dimensions Fig.1 VCSP85H1

Function

- Built in 6dB AMP.
- Built in standby function
- Built in LPF (8 order) (f=4.5MHz)
- Built in shunt SW of output terminal
- No output coupling capacitor required

※ Radiation resistance is not included in the design.

#### ■ Absolute Maximum Ratings (Ta=25°C)

Parameter	Symbol	Limits	Unit
Supply voltage	Vcc	3.55	V
Power dissipation	Pd	580	mW
Operating temperature	Topr	-40~+85	°C
Storage temperature	Tstg	-55~+125	°C

- \* In case mounting the ROHM standard application board (50mm × 58mm × 1.6mm)
- \* Reduced by 5.8 mW/°C at 25°C or higher.

#### ■ Operating range (Ta=25°C)

Parameter	Symbol	Min.	Typ.	Max.	Unit
Supply voltage	Vcc	2.5	3.0	3.45	V

#### Status of this document

The Japanese version of this document is the formal specification.

A customer may use this translation version only for a reference to help reading the formal version.

If there are any differences in translation version of this document, formal version takes priority.

#### Application example

The application circuit is recommended for use. Make sure to confirm the adequacy of the characteristics.

When using the circuit with changes to the external circuit constants, make sure to leave an adequate margin for external components including static and transitional characteristics as well as dispersion of the IC.

Note that ROHM cannot provide adequate confirmation of patents.

The product described in this specification is designed to be used with ordinary electronic equipment or devices (such as audio-visual equipment, office-automation equipment, communications devices, electrical appliances, and electronic toys).

Should you intend to use this product with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

ROHM assumes no responsibility for use of any circuits described herein, conveys no license under any patent or other right, and makes no representations that the circuits are free from patent infringement.

**■ Electrical characteristics** 【Unless otherwise noted, Ta=25°C, VCC=3V】

Parameter		Symbol	Limits			Unit	conditions
			Min.	Typ.	Max.		
Circuit current	ACTIVE	I <sub>CC1</sub>	—	15	25	mA	No signal
	STANDBY	I <sub>CC2</sub>	—	0.0	2	μA	Standby mode
	INPUT	I <sub>CC3</sub>	—	100	200	μA	Input mode(STBY=1.5V)
Voltage gain		G <sub>V</sub>	+5.5	+6.0	+6.5	dB	V <sub>in</sub> =100KHz, 1.0Vpp
Maximum output level		V <sub>omv</sub>	4.5	5.2	—	Vpp	f=10KHz, THD=1%
Frequency characteristics	1	G <sub>f1</sub>	-1.15	-0.2	0.0	dB	V <sub>in</sub> =1.0Vpp f=4.5MHz/100KHz
	2	G <sub>f2</sub>	-5.0	-1.4	-0.5	dB	V <sub>in</sub> =1.0Vpp f=8.0MHz/100KHz
	3	G <sub>f3</sub>	—	-28	-18	dB	V <sub>in</sub> =1.0Vpp f=18MHz/100KHz
Differential Gain		D <sub>G</sub>	—	0.5	3.0	%	V <sub>IN</sub> = 1.0Vpp Standard stair step signal
Differential Phase		D <sub>P</sub>	—	1.0	3.0	deg	V <sub>IN</sub> = 1.0Vpp Standard stair step signal
Output pin source current		I <sub>extin</sub>	15	30	—	mA	Add 4.5V to Output pin through 150Ω
Output DC offset		V <sub>off</sub>	-50	0	50	mV	No signal V <sub>off</sub> =(V <sub>out</sub> pin voltage) ÷ 2
Standby SW Change Voltage	High Level	V <sub>thH</sub>	VCC-0.2	—	VCC	V	STANDBY mode
	Middle Level	V <sub>thM</sub>	VCC×0.5 -0.2	VCC×0.5	VCC×0.5 +0.2	V	INPUT mode
	Low Level	V <sub>thL</sub>	GND	—	0.2	V	ACTIVE mode
Standby SW Output Current	Middle Level	I <sub>thM</sub>	—	8	15	μA	1.5V is applied to B3
	Low Level	I <sub>thL</sub>	—	23	35	μA	0.0V is applied to B3
Resistance between GND – OUTPUT terminal at INPUT mode		R <sub>ON</sub>	—	3	—	Ω	
Input Impedance		R <sub>in</sub>	105	150	195	kΩ	1.0V is applied to A3 Input current measurement

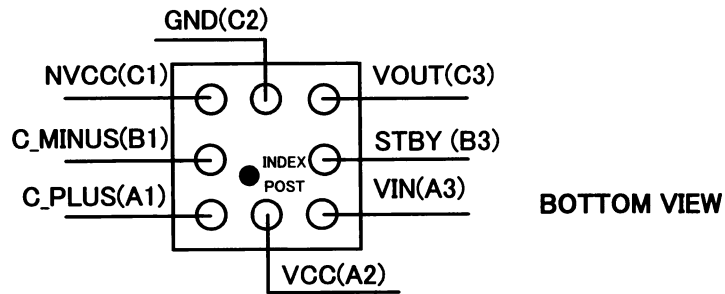

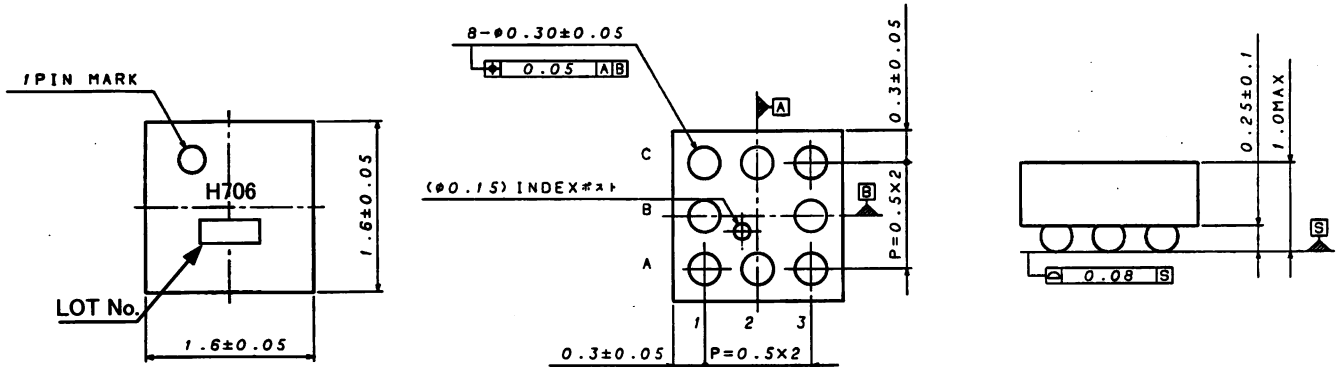

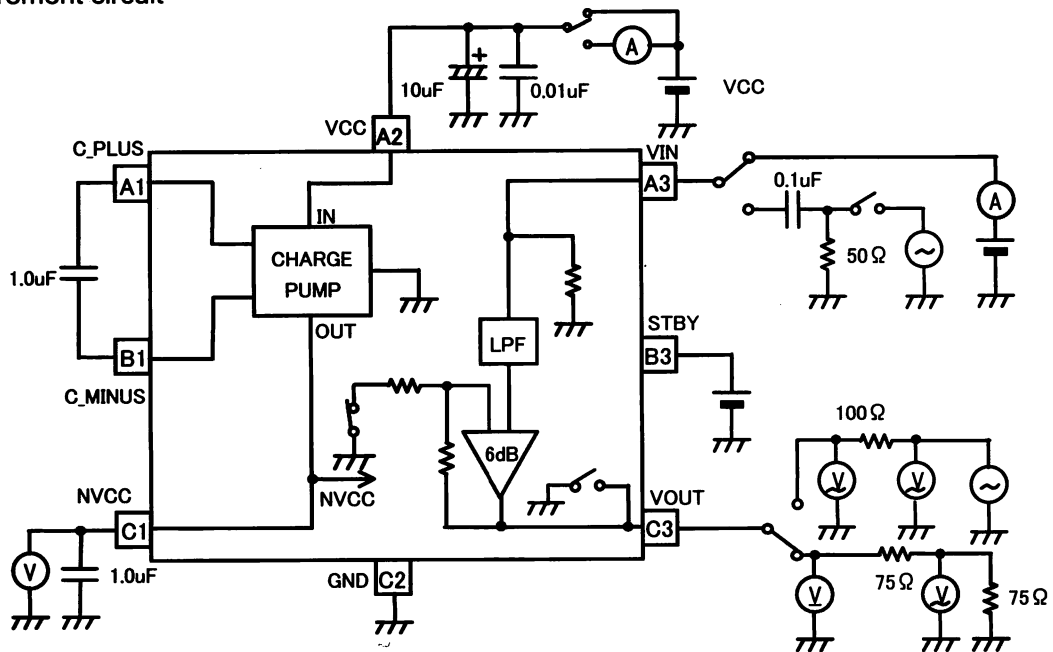

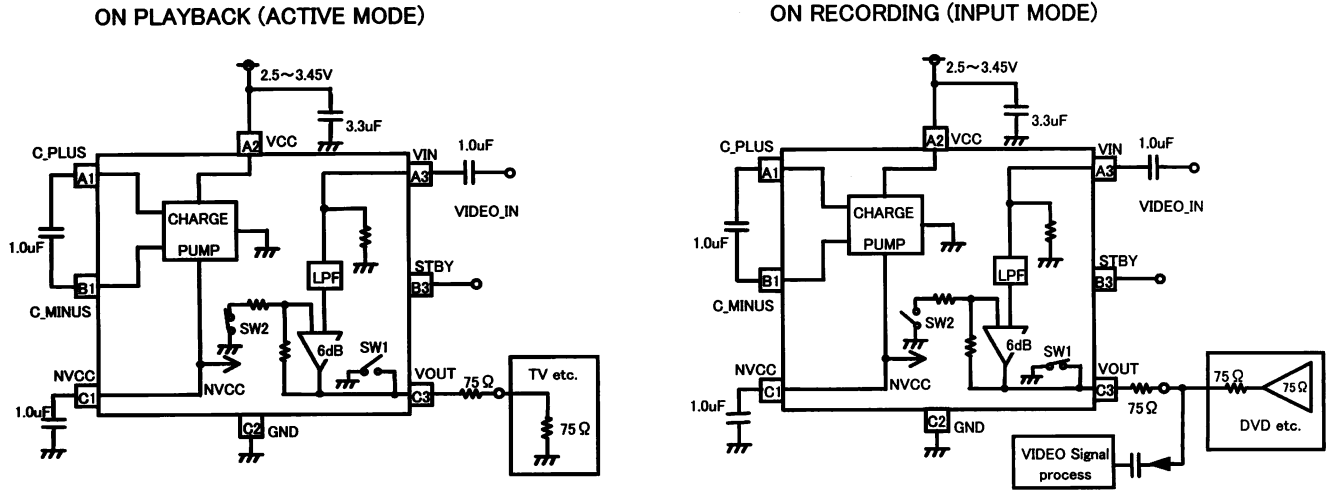

Fig.1

Measurement circuit

※ Measurement circuit is intended for shipment inspections, and differs from application circuit.

■ Application circuit

STBY pin settings	Operational mode	SW1	SW2
HIGH	STANDBY	OFF	OFF
MIDDLE	INPUT	ON	OFF
LOW	ACTIVE	OFF	ON

■ Cautions on use

- (1) Layout of decoupling capacitor  
As the wiring length of decoupling capacitor between VCC terminal (A2) and GND terminal (C2) becomes longer, the noise quality becomes worse. Make an enough consideration about the layout of decoupling capacitor.
- (2) Absolute maximum ratings  
If applied voltage, operating temperature range, or other absolute maximum ratings are exceeded, the LSI may be damaged. Do not apply voltages or temperatures that exceed the absolute maximum ratings. If you think of a case in which absolute maximum ratings are exceeded, enforce fuses or other physical safety measures and investigate how not to apply the conditions under which absolute maximum ratings are exceeded to LSI.
- (3) Operation in strong magnetic fields  
Adequately evaluate use in a strong magnetic field, since there is a possibility of malfunction.

### Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

#### About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
