# C8-FR1, C10-FR1, C13-FR Series

Coils, Filters

## OUTLINE

Power inductors for preventing the diffusion of noises generated from power circuits and suppressing noise components coming through the power lines.

## FEATURES

1. Power inductors are made of materials resistible to a large current (5.0A max. to 9.0A max.) .
2. Winding start terminal can be indicated.
3. These products can be packaged by radial taping for delivery.

## USES

Power circuits of TV, VCR, display monitors, computers, and other units.

Power circuits of air conditioners, electric rice boilers, refrigerators, washing machines, cleaners, pots, and other devices.
