

ESD5Z Series

Transient Voltage Suppressors for ESD Protection

(Pb) Lead(Pb)-Free

TRANSIENT VOLTAGE SUPPRESSORS
200 WATTS
2.5-7.0 VOLTS

Description:

* The ESD5Z Series is designed to protect voltage sensitive components from ESD and transient voltage events. Excellent clamping capability, low leakage, and fast response time, make these parts ideal for ESD protection on designs where board space is at a premium. Because of its small size, it is suited for use in cellular phones, portable devices, digital cameras, power supplies and many other portable applications.

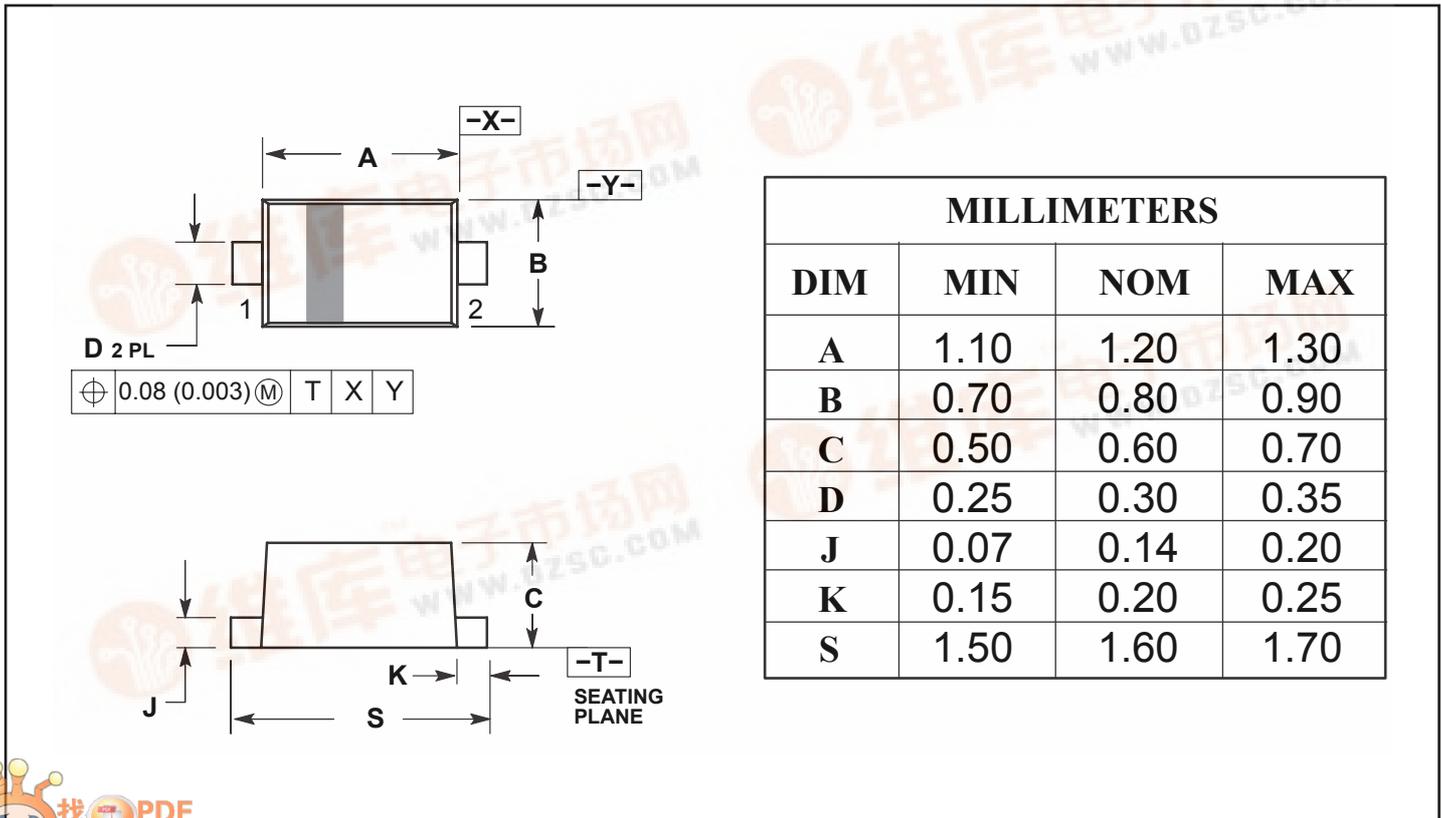

Features:

- * Stand-off Voltage: 2.5 V – 7.0 V
- * Peak Power up to 200 Watts @ 8 x 20 μs Pulse
- * Low Leakage
- * Response Time is Typically < 1 ns
- * ESD Rating of Class 3 (> 16 kV) per Human Body Model
- * IEC61000-4-2 Level 4 ESD Protection
- * IEC61000-4-4 Level 4 EFT Protection

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.
