

InGaAs-APD/Preamp Receiver

FRM5W231KT/LT

FEATURES

- Data rate up to 2.5Gb/s
- -32dBm typ. sensitivity
- 30µm active area APD chip with GaAs pre-amplifier
- Small co-axial package with single mode fiber

APPLICATIONS

- High bit rate long haul optical transmission systems operating at 2.5Gb/s

DESCRIPTION

These APD preamplifiers use an InGaAs APD chip with GaAs IC preamplifier. The KT package is designed for a horizontal PC board mount. The LT package is secured by a vertical flange. Each package is connected with single mode fiber by Nd: YAG welding. The detector preamplifier is DC coupled and has a low electrical output when the APD is illuminated.
