－Wide Operating Voltage Range of 2 V to 6 V
－High－Current Inverting Outputs Drive Up To 10 LSTTL Loads
－Low Power Consumption，80－$\mu \mathrm{A}$ Max Icc
－Typical $\mathrm{t}_{\mathrm{pd}}=14 \mathrm{~ns}$
－$\pm 4$－mA Output Drive at 5 V
－Low Input Current of $1 \mu \mathrm{~A}$ Max
－8－Bit Parallel－Out Storage Register

## Performs Serial－to－Parallel Conversion With

 Storage－Asynchronous Parallel Clear
－Active－High Decoder
－Enable Input Simplifies Expansion
－Expandable for n－Bit Applications
－Four Distinct Functional Modes

## description／ordering information

These 8－bit addressable latches are designed for general－purpose storage applications in digital systems．Specific uses include working registers， serial－holding registers，and active－high decoders or demultiplexers．They are multifunctional devices capable of storing single－line data in eight addressable latches and being a 1 －of－ 8 decoder or demultiplexer with active－high outputs．

## SN54HC259, SN74HC259

8-BIT ADDRESSABLE LATCHES

SCLS134E - DECEMBER 1982 - REVISED SEPTEMBER 2003

## description/ordering information (continued)

Four distinct modes of operation are selectable by controlling the clear (CLR) and enable ( $\overline{\mathrm{G}}$ ) inputs. In the addressable-latch mode, data at the data-in terminal is written into the addressed latch. The addressed latch follows the data input, with all unaddressed latches remaining in their previous states. In the memory mode, all latches remain in their previous states and are unaffected by the data or address inputs. To eliminate the possibility of entering erroneous data in the latches, $\bar{G}$ should be held high (inactive) while the address lines are changing. In the 1-of-8 decoding or demultiplexing mode, the addressed output follows the level of the D input with all other outputs low. In the clear mode, all outputs are low and unaffected by the address and data inputs.

## SN54HC259, SN74HC259

## 8-BIT ADDRESSABLE LATCHES

## logic diagram, each internal latch (positive logic)

## absolute maximum ratings over operating free-air temperature range (unless otherwise noted) $\dagger$

| Supply voltage range, $\mathrm{V}_{\mathrm{CC}}$ | -0.5 V to 7 V |
| :---: | :---: |
| Input clamp current, $\mathrm{I}_{\mathrm{IK}}\left(\mathrm{V}_{1}<0\right.$ or $\left.\mathrm{V}_{1}>\mathrm{V}_{\text {CC }}\right)$ (see Note 1) | $\pm 20 \mathrm{~mA}$ |
| Output clamp current, $\mathrm{I}_{\mathrm{OK}}\left(\mathrm{V}_{\mathrm{O}}<0\right.$ or $\left.\mathrm{V}_{\mathrm{O}}>\mathrm{V}_{\mathrm{CC}}\right)$ (see Note 1) | $\pm 20 \mathrm{~mA}$ |
| Continuous output current, $\mathrm{I}_{\mathrm{O}}\left(\mathrm{V}_{\mathrm{O}}=0\right.$ to $\left.\mathrm{V}_{\mathrm{CC}}\right)$ | $\pm 25 \mathrm{~mA}$ |
| Continuous current through $\mathrm{V}_{\mathrm{CC}}$ or GND | $\pm 50 \mathrm{~mA}$ |
| Package thermal impedance, $\theta_{\text {JA }}$ (see Note 2): D package | $73^{\circ} \mathrm{C} / \mathrm{W}$ |
| N package | $67^{\circ} \mathrm{C} / \mathrm{W}$ |
| NS package | $64^{\circ} \mathrm{C} / \mathrm{W}$ |
| PW package | $108^{\circ} \mathrm{C} / \mathrm{W}$ |

$\dagger$ Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
NOTES: 1. The input and output voltage ratings may be exceeded if the input and output current ratings are observed.
2. The package thermal impedance is calculated in accordance with JESD 51-7.

${ }^{(1)}$ The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but Tl does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.
${ }^{(2)}$ Eco Plan - May not be currently available - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
None: Not yet available Lead (Pb-Free).
Pb -Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed $0.1 \%$ by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Green (RoHS \& no $\mathbf{S b} / \mathbf{B r}$ ): TI defines "Green" to mean "Pb-Free" and in addition, uses package materials that do not contain halogens, including bromine ( Br ) or antimony $(\mathrm{Sb})$ above $0.1 \%$ of total product weight.
${ }^{(3)}$ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDECindustry standard classifications, and peak solder temperature.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Tl's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with Tl's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
