

T1/DS1

Output Transformer

TFS 2573

TFS2573 is specifically designed for use as a Line Output Transformer in T1/DS1 applications.

It has been approved by **MITEL** for use with their **MH89760** device.

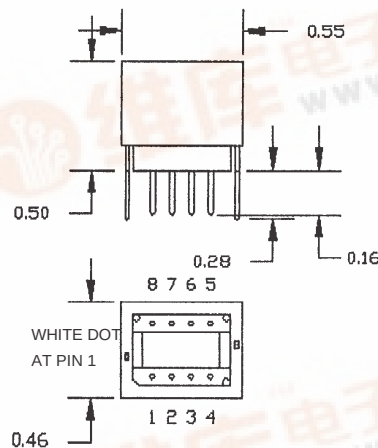

TFS2573 is available in 3 versions: - 0, -1 and -2 for 100, 75 and 120 Ohm line impedances respectively

Typical applications are:

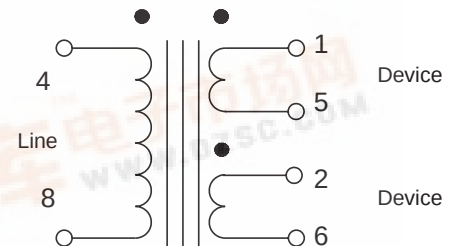

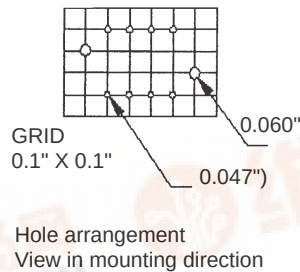

- PBX or computer to T1 Digital Trunks.
- High speed data link using T1 Digital Trunk.
- TDM Multiplexers.
