

### **Benefits**

- . High Flux Output.
- . Low Profile.
- . Low Thermal Resistance.
- . Low Power Consumption.
- .The product itself will remain within RoHS compliant version.
- . ESD-withstand voltage: up to 4KV.

## **Descriptions**

This revolutionary package design allows the light designer to reduce the number of LEDs required and provide a more uniform and unique illuminated appearance than with other LED solutions. This is possible through the efficient optical package design and high-current capabilities.

The low profile package can be easily coupled with reflectors or lenses to efficiently distribute light and provide the desired light appearance.

### **Applications**

- . Automotive Exterior Lighting
- . Electronic Signs and Signals
- . Channel Letter
- . Special Lighting application

### **Package Dimensions**

**Notes:** 1.All dimensions are in millimeters

- 2.An epoxy meniscus may extend about 1.5mm(0.059") down the leads
- 3. Tolerances unless dimensions ±0.25mm

## **Absolute Maximum Ratings (Ta=25°C)**

Parameter	Symbol	Rating	Units
Continuous Forward Current	$I_{\mathrm{F}}$	30	mA
Peak Forward Current(Duty 1/10 @ 1KHZ)	$I_{FP}$	100	mA
Operating Temperature	$T_{opr}$	-40 ~ +85	$^{\circ}\!\mathbb{C}$
Storage Temperature	$T_{stg}$	-40 <b>~</b> +100	$^{\circ}\!\mathbb{C}$
Soldering Temperature(T=5 sec)	$T_{sol}$	$260 \pm 5$	$^{\circ}$
Power Dissipation	$P_d$	120	mW
Zener Reverse Current	Iz	100	mA
Electrostatic Discharge	ESD	4K	V
LED Junction Temperature	Tj	110	$^{\circ}\!\mathbb{C}$

### **Notes**

- 1. Above specification may be changed without notice. EVERLIGHT will reserve authority on material change for above specification.
- 2. When using this product, please observe the absolute maximum ratings and the instructions for using outlined in these specification sheets. EVERLIGHT assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.
- These specification sheets include materials protected under copyright of EVERLIGHT corporation. Please don't reproduce or cause anyone to reproduce them without EVERLIGHT's consent.
- 4. Below the zener reference voltage Vz, all the current flows through LED and as the voltage rises to Vz, the zener diode "breakdown." If the voltage tries to rise above Vz current flows through the zener branch to keep the voltage at exactly Vz.
- 5. When the LED is connected using serial circuit, if either piece of LED is no light up but current can't flow through causing others to light down. In new design, the LED is parallel with zener diode. if either piece of LED is no light up but current can flow through causing others to light.

## 31-01/G4C-ARTB

### 6. Soldering Condition

Careful attention should be paid during soldering. When soldering, leave more then 3mm from solder joint to case, and soldering beyond the base of the tie bar is recommended.

Avoiding applying any stress to the lead frame while the LEDs are at high temperature particularly when soldering.

Recommended soldering conditions:

Hand Soldering		DIP Soldering		
Temp. at tip of iron	Γemp. at tip of iron 400°C Max. (30W Max.)		100°C Max. (60 sec Max.)	
Soldering time	3 sec Max.	Bath temp.	265 Max.	
Distance	3mm Min.(From solder joint	Bath time.	5 sec Max.	
	to case)			
		Distance	3mm Min.
