## DC-DC CONVERTERS POLA Non-isolated

- 50 A output current ${ }^{(5)}$

NEW Product

- 12 V input voltage ( 8 Vdc to 14 Vdc )
- Wide-output voltage adjust ( 0.8 Vdc to 5.5 Vdc )
- Auto-track ${ }^{\text {TM }}$ sequencing*
- Margin up/down controls
- Efficiencies up 96\%
- Output ON/OFF inhibit
- Differential remote sense
- Programmable Under-Voltage Lockout (UVLO)
- Point-of-Load-Alliance (POLA) compatible
- Available RoHS compliant

The PTH12040 is a next generation series of non-isolated dc-dc converters offering some of the most advanced POL features available in the industry. The primary new feature provides for sequencing between multiple modules, a function, which is becoming a necessity for powering advanced silicon including DSP's, FPGA's and ASIC's requiring controlled power-up and power-down Other industry leading features include margin up/down controls and efficiencies up to $96 \%$. The PTH12040 has an input voltage of 8 Vdc to 14 Vdc and offers a wide 0.8 Vdc to 5.5 Vdc output voltage range with up to 50 A output current, which allows for maximum design flexibility and a pathway for future upgrades.

All specifications are typical at nominal input, full load at $25^{\circ} \mathrm{C}$ unless otherwise stated
$C_{\text {in }}=1000 \mu F, C_{\text {out }}=660 \mu \mathrm{~F}$

| EMC CHARACTERISTICS |  |  |
| :---: | :---: | :---: |

| Mechanical Package Always 0 | Output Voltage Code |
| Output Voltage Adjustment of the PTH12040W Series |  |
| The ultra-wide output voltage trim range offers major advantages to users who select the PTH12040W. It is no longer necessary to purchase a variety of modules in order to cover different output voltages. The output voltage can be trimmed in a range of 0.8 Vdc to 5.5 Vdc . When the PTH12040W converter leaves the factory the output has been adjusted to the default voltage of 0.8 V . |  |

| EFFICIENCY TABLE $\left(\mathrm{I}_{\mathrm{O}}=35 \mathrm{~A}\right)$ |  |
| :---: | :---: |
| OUTPUT VOLTAGE | EFFICIENCY |
| $\mathrm{Vo}=5.0 \mathrm{~V}$ | $96 \%$ |
| $\mathrm{Vo}=3.3 \mathrm{~V}$ | $95 \%$ |
| $\mathrm{Vo}=2.5 \mathrm{~V}$ | $93 \%$ |
| $\mathrm{Vo}=2.0 \mathrm{~V}$ | $92 \%$ |
| $\mathrm{Vo}=1.8 \mathrm{~V}$ | $91 \%$ |
| $\mathrm{Vo}=1.5 \mathrm{~V}$ | $90 \%$ |
| $\mathrm{Vo}=1.2 \mathrm{~V}$ | $88 \%$ |
| $\mathrm{Vo}=1.0 \mathrm{~V}$ | $86 \%$ |
| $\mathrm{Vo}=0.8 \mathrm{~V}$ | $82 \%$ |

## Notes

1 The set-point voltage tolerance is affected by the tolerance and stability of $R_{S E T}$. The stated limit is unconditionally met if $R_{S E T}$ has a tolerance of $1 \%$ with $100 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ or better temperature stability.
2 This control pin has an internal pull-up to 5 V nominal. If it is left opencircuit the module will operate when input power is applied. A small lowleakage ( $<100 \mathrm{nA}$ ) MOSFET is recommended for control. For further information, consult the related application note. For further information, consult Application Note 193.
$3 \mathrm{~A} 1000 \mu \mathrm{~F}$ input capacitor is required for proper operation. The capacitor must be rated for a minimum of 300 mA rms of ripple current.
4 This is with a $1 \mathrm{~A} / \mu$ s loadstep, 50 to $100 \% \mathrm{I}_{\text {omax. }} \mathrm{I}_{\mathrm{o}}=680 \mu \mathrm{~F}$
5 See Figures 1 and 2 for safe operating curves.
6 When the set-point voltage is adjusted higher than 3.6 V , a 10 V minimum input voltage is recommended.
7 A small low-leakage ( $<100 \mathrm{nA}$ ) MOSFET is recommended to control this pin . The opencircuit voltage is less than 1 Vdc .
8 These are the default voltages. The y may be adjusted using the 'UVLO Prog' control input. Consult Application Note No. 193 for further information.
9 To order Pb-free (RoHS compatible) surface-mount parts replace the mounting option 'S' with 'Z', e.g. PTH12040WAZ. To order Pb-free (RoHS compatible) through-hole parts replace the mounting option ' H ' with 'D', e.g. PTH12040WAD.
10 NOTICE: Some models do not support all options. Please contact your local Artesyn representative or use the on-line model number search tool at http://www.artesyn.com/powergroup/products.htm to find a suitable alternative.

# PTH12040 

12 Vin single output

Figure 1 - Safe Operating Area
Vin = 12 V , Output Voltage $=3.3 \mathrm{~V}$ (See Note A)

Figure 3-Efficiency vs Load Current Vin = 12 V (See Note B)

Figure 2 - Safe Operating Area
Vin = 12 V, Output Voltage $=1.2$ V (See Note A)

Figure 4 - Standard Application

## Notes

A SOA curves represent the conditions at which internal components are within the Artesyn derating guidelines.
B Characteristic data has been developed from actual products tested at $25^{\circ} \mathrm{C}$. This data is considered typical data for the converter.
