

## Product Description

The PE3511 is a high-performance static UltraCMOS™ prescaler with a fixed divide ratio of 2. Its operating frequency range is DC to 1500 MHz. The PE3511 operates on a nominal 3 V supply and draws only 8 mA. The input and output interfaces support both AC-coupled, low-Z RF as well as direct connection to low voltage positive logic devices. It is packaged in a small 6-lead SC-70 and is ideal for frequency scaling solutions

The PE3511 is manufactured in Peregrine's patented Ultra Thin Silicon (UTSi©) CMOS process, offering the performance of GaAs with the economy and integration of conventional CMOS.

## 1500 MHz Low Power UltraCMOS™ Divide-by-2 Prescaler

### Features

- DC to 1500 MHz operation
- Fixed divide ratio of 2
- Low-power consumption: 8 mA typical @ 3V
- RF or LV Digital Interface
- Ultra-small package: 6-lead SC-70

**Table 1. Electrical Specifications** ( $Z_S = Z_L = 50 \Omega$ )

$V_{DD} = 3.0 \text{ V}$ ,  $-40^\circ \text{ C} \leq T_A \leq 85^\circ \text{ C}$ , unless otherwise specified

Parameter	Conditions	Minimum	Typical	Maximum	Units
Supply Voltage		2.85	3.0	3.15	V
Supply Current			8	12	mA
Input Frequency ( $F_{in}$ )		DC		1500	MHz
Input Power ( $P_{in}$ )	$DC < F_{in} \leq 1000 \text{ MHz}$	-10		+10	dBm
	$1000 \text{ MHz} < F_{in} \leq 1500$	0			dBm
Output Power ( $P_{out}$ )	$DC < F_{in} \leq 1500 \text{ MHz}$	2			dBm

**Table 2. DC Electrical Characteristics (-40° C ≤ T<sub>A</sub> ≤ 85° C)**

Symbol	Parameter	Condition	Typical	Unit
V <sub>IH</sub>	High Level Input Voltage	2.7 V ≤ V <sub>DD</sub> ≤ 3.3 V	2.0	V
V <sub>IL</sub>	Low Level Input Voltage	2.7 V ≤ V <sub>DD</sub> ≤ 3.3 V	0.8	V
V <sub>OH</sub>	High Level Output Voltage	V <sub>DD</sub> = 2.7 V; I <sub>OH</sub> = 2.9 mA	2.2	V
V <sub>OL</sub>	Low Level Output Voltage	V <sub>DD</sub> = 2.7 V; I <sub>OL</sub> = 2.6 mA	0.4	V

**Table 3. AC Characteristics (-40° C ≤ T<sub>A</sub> ≤ 85° C)**

Symbol	Parameter	Condition*	Typical	Unit
t <sub>PHL</sub>	Propagation Delay (High to Low)	50 MHz Pulse Train Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	2.6	ns
t <sub>PLH</sub>	Propagation Delay (Low to High)	50 MHz Pulse Train Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	2.8	ns
t <sub>r</sub>	Output Rise Time (10% to 90%)	50 MHz Pulse Train Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	2.2	ns
t <sub>f</sub>	Output Fall Time (90% to 10%)	50 MHz Pulse Train Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	2.1	ns

\* See figure 5 for AC test circuit

**Table 4. Typical Output Swing (V<sub>DD</sub> = 2.7 V)**

Frequency	Condition	Typical	Unit
50 MHz	200 mVp-p Sinusoidal Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	2.3	Vp-p
500 MHz	200 mVp-p Sinusoidal Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	1.9	Vp-p
1500 MHz	200 mVp-p Sinusoidal Input; C <sub>L</sub> = 10 pF, R <sub>L</sub> = 500 Ω	1.6	Vp-p

**Figure 3. Pin Configuration (Top View)**

**Table 5. Pin Descriptions**

Pin No.	Pin Name	Description
1	N/C	No Connect. This pin should be left open.
2	GND	Ground pin. Ground pattern on the board should be as wide as possible to reduce ground impedance.
3	IN	Input signal pin. DC blocking capacitor required (100 pF typical).
4	V <sub>DD</sub>	Power supply pin. Bypassing is required.
5	GND	Ground pin.
6	OUT	Divided frequency output pin. DC blocking capacitor required (100 pF typical).

**Table 6. Absolute Maximum Ratings**

Symbol	Parameter/Conditions	Min	Max	Units
V <sub>DD</sub>	Supply voltage		4.0	V
P <sub>in</sub>	Input Power		13	dBm
T <sub>ST</sub>	Storage temperature range	-65	150	°C
T <sub>OP</sub>	Operating temperature range	-40	85	°C
VESD	ESD voltage (Human Body Model)		2000	V

Absolute Maximum Ratings are those values listed in the above table. Exceeding these values may cause permanent device damage. Exposure to absolute maximum ratings for extended periods may affect device reliability.

## Electrostatic Discharge (ESD) Precautions

When handling this UltraCMOS™ device, observe the same precautions that you would use with other ESD-sensitive devices. Although this device contains circuitry to protect it from damage due to ESD, precautions should be taken to avoid exceeding the rating specified in Table 6.

## Latch-Up Avoidance

Unlike conventional CMOS devices, UltraCMOS™ devices are immune to latch-up.

## Device Functional Considerations

The PE3511 divides an input signal, up to a frequency of 1500 MHz, by a factor of two thereby producing an output frequency at half the input frequency. To work properly with low impedance, ground referenced interfaces, the input and output signals (pins 3 & 6) must be AC coupled via an external capacitor, as shown in the test circuit in Figure 4.

The ground pattern on the board should be made as wide as possible to minimize ground impedance. See Figure 9 for a layout example.

## Evaluation Kit

### Evaluation Kit Operation

The SC-70 Prescaler Evaluation Board was designed to help customers evaluate the *PE3511* divide-by-2 prescaler. On this board, the device input (pin 3) is connected to connector J1 through a 50  $\Omega$  transmission line. A series capacitor (C1) provides the necessary DC block for the device input. A value of 100 pF was used for this board layout; other applications may require a different value.

The device output (pin 6) is connected to J3 through a 50  $\Omega$  transmission line. A series capacitor (C5) provides the necessary DC block for the device output. This capacitor value must be chosen to have a low impedance at the desired output frequency of the device. A value of 100 pF was chosen for the evaluation board. At both input and output, select a capacitor value that offers low series reactance while ensuring that any parasitic resonances are well above the operating bandwidth.

The board is constructed of a two-layer FR4 material with a total thickness of 0.031". The bottom layer provides ground for the RF transmission lines. The transmission lines were designed using a coplanar waveguide above ground plane model with trace width of 0.030", trace gaps of 0.007", dielectric thickness of 0.028", metal thickness of 0.0014", and  $\epsilon_r$  of 4.4. Note that the predominate mode of these transmission lines is coplanar waveguide. Liberal numbers of plated through holes unite the top and

bottom ground areas for best performance.

J6 provides DC power to the device via pin 4. Two decoupling capacitors (100 pF, 1000 pF) are included on this trace. It is the customer's responsibility to determine proper supply decoupling for their design application.

### Applications Support

If you have a problem with your evaluation kit or if you have applications questions call (858) 731-9400 and ask for applications support. You may also contact us by fax or e-mail:

## Data Sheet Identification

### **Advance Information**

The product is in a formative or design stage. The data sheet contains design target specifications for product development. Specifications and features may change in any manner without notice.

### **Preliminary Specification**

The data sheet contains preliminary data. Additional data may be added at a later date. Peregrine reserves the right to change specifications at any time without notice in order to supply the best possible product.

### **Product Specification**

The data sheet contains final data. In the event Peregrine decides to change the specifications, Peregrine will notify customers of the intended changes by issuing a DCN (Document Change Notice).

The information in this data sheet is believed to be reliable. However, Peregrine assumes no liability for the use of this information. Use shall be entirely at the user's own risk.

No patent rights or licenses to any circuits described in this data sheet are implied or granted to any third party.

Peregrine's products are not designed or intended for use in devices or systems intended for surgical implant, or in other applications intended to support or sustain life, or in any application in which the failure of the Peregrine product could create a situation in which personal injury or death might occur. Peregrine assumes no liability for damages, including consequential or incidental damages, arising out of the use of its products in such applications.
