

## SNAP-ON LOAD DETECTOR "LD-50"

- This new revolutionary snap-on load detector mounts on pre-wired systems without disrupting existing connections. (Field assembleable.)
- Broad frequency response: 30Hz. to 15kHz. (See Curve.)
- Measure currents up to 50 Amps continuous.
- High reliability long lasting magnetic device.
- Output linear to within 3% from 5 to 50Amps input. (See VL/I<sub>p</sub> vs. I<sub>p</sub> curves.)
- Excellent for low-budget energy management and automation control.
- Available pre-assembled or un assembled, to snap over existing wiring.
- Note: These features have made this new device the answer to a myriad of new applications such as monitoring relays and lamps, Hi/Low current limits, instrumentation, solid-state switchgear, motor controls, closed loop current feed back, and much more.

### NEW HIGH SENSITIVITY CURRENT TRANSFORMERS.

The high-sensitivity series of current transformers has been specifically designed for those applications where a low value of current is to be monitored.

A primary winding is supplied (pins 1&2) which helps increase the sensitivity of the transformer.

\* Many customized output voltages and currents are available on special request, at same low price.
