TM-2000 Universal Press

The Molex TM-2000 Universal Press is designed to provide an effective method of applying a wide range of side and rear feed terminals to a pre-stripped discrete wire and cable. The TM-2000 is an inexpensive, electrically controlled, single cycle fly-wheel press designed for mid-volume, semi-automatic bench operations.

Features and Benefits

- Accepts FineAdjust and Mini-Mac Applicators with side and rear feeds. Uses most industry standard applicators, which reduces tooling costs and provides production flexibility.
- Set to industry standard shut height of 135.80mm (5.345"). Operator makes no adjustments, which reduces set-up time and ensures repeatability.
- No tools required. Quick release base plate. Fast and simple applicator changeover which increases production and reduces operators learning curve.
- Resettable counter for accurate batch counting.
- Meets OSHA safety and noise requirements, which will reduce risk of injury.
- Safety interlock switch is attached to front guard to prevent press from cycling if guard is open during operation.
- Low maintenance because all bearings are sealed.
