### **Temperature Re-rating Curve**

#### Note

 Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

#### Example:

For continuous operation at 70 degrees celsius, the fuse should be derated as follows: I = (0.75)(0.80)I  $_{\rm RAT}$  = (0.60)I  $_{\rm RAT}$ 

The temperature derating curve represents the nominal conditions. For questions about temperature derating curve, please consult Littelfuse technical support for assistance.
