

Fiber Optic Swabs

2316, 2317

Introduction

The 1.25mm (2316) and 2.5mm (2317) wrapped foam fiber optic swabs are ideal for removing transmission disrupting contaminants in bulkhead connectors. The head conforms to the various connector shapes, cleaning the conductor bulkhead corners inside the bulkhead pocket. These swabs may be used wet or dry to remove dirt and oil contamination. Each swab is manufactured with superior proprietary foam; no glues are used in the manufacturing process, thereby minimizing leachable contaminants.

Chemical Components

This product does not contain any hazardous ingredients as per OSHA 29 CFR 1910.1200 Subpt.(z).

Environmental Policy

Techspray® is committed to developing products to ensure a safer and cleaner environment. We will continue to meet and sustain the regulations of all federal, state and local government agencies.
