

Overview

The LC79401D is a segment driver LSI for use with large scale dot-matrix LCD displays. The LC79401D latches 80 bits of display data sent from a controller using a 4-bit parallel transfer technique and generates LCD drive signals. When combined as a kit with a common driver, either the LC7943D (QIP80D), the LC79430D (QIP100D), or the LC79431D (QIP100D), the LC79401D can drive large screen LCD panels.

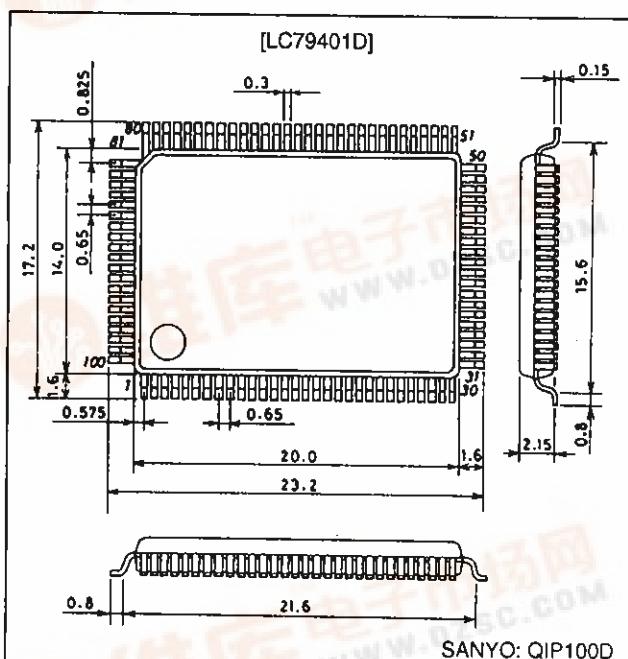

Features

- Incorporates LCD drive circuits for 80 bits of display
- Supports display duties from 1/64 to 1/256
- The provision of a chip disable pin supports power reduction in large-scale panels.
- Allows external provision of the bias power supply
- Operating supply voltage/operating temperature
 V_{DD} (logic block): $5\text{ V} \pm 10\%$ /-20 to +75°C
 $V_{DD}-V_{EE}$ (LCD block): 12 to 32 V/-20 to +75°C
- Data transfer clock: 6.0 MHz (max), bidirectional shifting supported
- Data input: 4-bit parallel input
- CMOS process
- 100-pin flat plastic package
