HOLDING TOOLS

General's nut starter and screw starters are used for starting and removing nuts and screws in hard-to-reach places. They can also be used when nuts and screws are too small to be held by hand while being threaded. The mechanical pickups are used to retrieve small objects from hard-to-reach places. The spring clamps will firmly hold parts or materials together when gluing or fastening and the telescoping alligator clip is ideal for lighting pilot lights and barbeques.

MECHANICAL PICKUP

- Strong four prong steel jaws retrieve small items from hard-to-reach places.
- 24" (60cm) reach.
- Smooth actuator for greater control.
- Chrome finish to prevent rust.
- Flexible shaft to avoid obstacles.

UPC CODE	NO.
22145 2	396

SLOTTED SCREW STARTER

- For starting or removing slotted screws in hard-to-reach areas. Can also be used when screws are too small to be held by hand while being threaded.
- Spring loaded steel chuck holds slotted screws from No. 3 to 7/16" sizes.
- Comfortable 5" long knurled aluminum handle.

UPC CODE	NO.
42684 0	8082

TELESCOPING ALLIGATOR CLIP

- Ideal for lighting pilot lights and barbeques.
- Jaw capacity: .170" (4.30mm)
- Overall length: 5-1/2" (140mm)
- Extended length: 24" (61cm)

UPC CODE	NO.
42217 0	400

CROSS POINT SCREW STARTER

- For starting or removing cross point screws in hard-to-reach areas. Can also be used when screws are too small to be held by hand while being threaded.
- Easy-to-use spring steel chuck holds screws from No. 6 to 1/4" size.
- Comfortable 5" long knurled aluminum handle.

UPC CODE	NO.
42686 4	8083
