TOSHIBA LED LAMP

**TLSU1008A (T04), TLOU1008A (T04), TLAU1008A (T04)
TLYU1008A (T04), TLGU1008A (T04), TLPGU1008A (T04)**

PANEL CIRCUIT INDICATOR

Unit in mm

- $1.6 \times 0.8 \times 0.6 \text{ mm (L} \times \text{W} \times \text{H)}$
TL□U1008A (T04) Series
- InGaAlP LED
- It can be manufactured high-luminosity of equipment or reduce of electric power consumption by change in the high-luminosity LED from general-luminosity one.
- Colors : Red, Orange, Amber, Yellow, Green, Pure green
- Since the products are only 0.6 mm thick, they are suitable for use in thin equipment.
- Incorporates opaque diffusing resin.
Good light diffusion-ideal for backlighting
- Can be mounted using surface mounter.
- Reflow soldering is possible.
- Standard embossed taping
4 mm pitch : T04 (4000 pcs / reel)
- Applications : As backlighting source for battery-powered equipment
As pilot light for compact equipment
In low-power electronic equipment, etc.

Weight : 1.3 mg

LINE-UP

PRODUCT NAME	COLOR	MATERIAL
TLSU1008A	Red	InGaAlP
TLOU1008A	Orange	InGaAlP
TLAU1008A	Amber	InGaAlP
TLYU1008A	Yellow	InGaAlP
TLGU1008A	Green	InGaAlP
TLPGU1008A	Pure Green	InGaAlP

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
- In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- Gallium arsenide (GaAs) is a substance used in the products described in this document. GaAs dust and fumes are toxic. Do not break, cut or pulverize the product, or use chemicals to dissolve them. When disposing of the products, follow the appropriate regulations. Do not dispose of the products with other industrial waste or with domestic garbage.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.

PACKAGING

The LED devices are packed in an aluminum envelope with silica-gel to avoid moisture absorption. The optical characteristics may be affected by exposure to moisture in the air prior to soldering and it should be stored under the following conditions.

Temperature : 5~30°C
 Relative Humidity : 60% or lower
 Time : 168 h max

Baking is required if the device have been stored unopened for more than 6 months or if the aluminum envelope has been opened for more than 168 h.

Recommended baking condition is 60°C for 12 h minimum in the dry atmosphere.

MOUNTING METHOD

SOLDERING

- Reflow soldering

Temperature profile

- Please perform the first reflow soldering within 168 h after opening the package with reference to the above temperature profile.

- Second time reflow soldering

In case of second reflow soldering, it should be performed within 168 h after first reflow under the above conditions.

Storage conditions before second reflow soldering : 30°C, 60% RH or lower

- Do not perform flow soldering.
- Make any necessary soldering corrections manually.
 (Do not do this more than once for any given pin.)

Soldering iron : 25 W

Temperature : no more than 300°C

Time : within 3 s

3. Tape Dimensions

(Unit in mm)

SYMBOL	DIMENSION	TOLERANCE	SYMBOL	DIMENSION	TOLERANCE
D	1.50	+0.1 / -0	P ₂	2.00	±0.05
E	1.75	±0.1	W	8.00	±0.1
P ₀	4.00	±0.1	P	4.00	±0.1
t	0.20	±0.05	A ₀	0.90	±0.1
F	3.50	±0.05	B ₀	1.75	±0.1
D ₁	0.60	±0.05	K ₀	0.75	±0.1

4. Reel Dimensions

Unit in mm

EIJA standard : RRM08B
Reel Material : Polystyene

5. Leader and Trailer

6. Packing Form

(1) Number of Devices per Reel and Carton

Reel	4000 devices
Carton	20000 devices

(2) Packing : Silica gel and reel are packed into sealed aluminum pack.

7. Notation Method

(1) Example : TLSU1008A (T04)

P / N :

TYPE	TLSU1008A		
ADD. C	(T04)	Q'TY	4000 pcs
NOTE	(rank symbol)	Lot Number	

(2) Label location :

Aluminum pack : Attached to center of one side
