## TOSHIBA Transistor <br> Silicon NPN Epitaxial Type（PCT process）Silicon PNP Epitaxial Type（PCT process）

## R N 49 A 2

## Switching，Inverter Circuit，Interface Circuit and Driver Circuit Applications．

－Including two devices in US6（ultra super mini type with 6 leads）
－With built－in bias resistors
－Simplify circuit design
－Reduce a quantity of parts and manufacturing process

## Equivalent Circuit and Bias Resistor Values

－TOSHIBA is continually working to improve the quality and the reliability of its products．Nevertheless，semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress．It is the responsibility of the buyer，when utilizing TOSHIBA products，to observe standards of safety，and to avoid situations in which a malfunction or failure of a TOSHIBA product could cause loss of human life，bodily injury or damage to property．In developing your designs，please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent products specifications． Also，please keep in mind the precautions and conditions set forth in the TOSHIBA Semiconductor Reliability Handbook．
