# QUADRUPLE 2-LINE TO 1-LINE DATA SELECTORS/MULTIPLEXERS

SCLS296B - JANUARY 1996 - REVISED JUNE 2000

 Package Options Include Plastic Small-Outline (D), Thin Shrink
Small-Outline (PW), and Ceramic Flat (W)
Packages, Ceramic Chip Carriers (FK), and
Standard Plastic (N) and Ceramic (J) DIPs

#### description

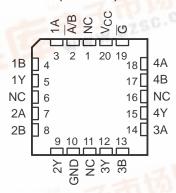

These monolithic data selectors/multiplexers contain inverters and drivers that supply full data selection to the four output gates. A separate strobe  $(\overline{G})$  input is provided. A 4-bit word is selected from one of two sources and is routed to the four outputs. The 'HC158 outputs provide inverted data.

The SN54HC158 is characterized for operation over the full military temperature range of –55°C to 125°C. The SN74HC158 is characterized for operation from –40°C to 85°C.

SN54HC158 . . . J OR W PACKAGE SN74HC158 . . . D, N, OR PW PACKAGE (TOP VIEW)

SN54HC158 . . . FK PACKAGE (TOP VIEW)

NC – No internal connection

#### **FUNCTION TABLE**

|   | INPU   | INPUTS |    |             |  |  |  |
|---|--------|--------|----|-------------|--|--|--|
| _ | SELECT | DA     | TA | OUTPUT<br>Y |  |  |  |
| G | A/B    | Α      | В  | ·           |  |  |  |
| Н | Х      | Х      | Х  | Н           |  |  |  |
| L | L      | L      | X  | Н           |  |  |  |
| L | L      | Н      | X  | L           |  |  |  |

| L | Н      | Х      | Н  | L           |  |  |  |

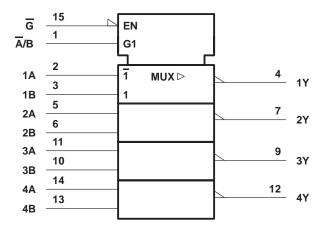

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

# SN54HC158, SN74HC158 QUADRUPLE 2-LINE TO 1-LINE DATA SELECTORS/MULTIPLEXERS

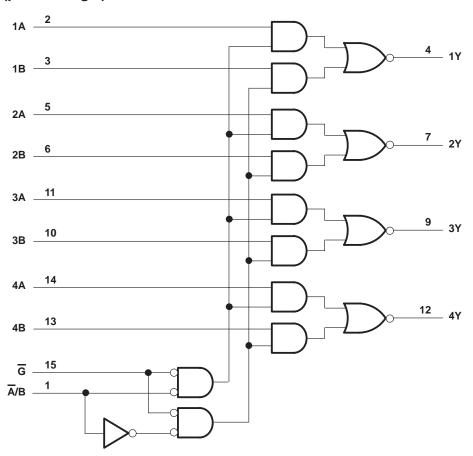

SCLS296B - JANUARY 1996 - REVISED JUNE 2000

## logic symbol†

<sup>†</sup> These symbols are in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12. Pin numbers shown are for the D, J, N, PW, and W packages.

### logic diagram (positive logic)

Pin numbers shown are for the D, J, N, PW, and W packages.

# SN54HC158, SN74HC158 QUADRUPLE 2-LINE TO 1-LINE DATA SELECTORS/MULTIPLEXERS

SCLS296B - JANUARY 1996 - REVISED JUNE 2000

### absolute maximum ratings over operating free-air temperature range†

| Supply voltage range, V <sub>CC</sub>   |                 | 0.5 V to 7 V   |
|---|-----------------|----------------|
| Input clamp current, $I_{IK}$ ( $V_I < 0$ or $V_I > V_{CC}$ ) (see                            | ee Note 1)      | ±20 mA         |
| Output clamp current, I <sub>OK</sub> (V <sub>O</sub> < 0 or V <sub>O</sub> > V <sub>CO</sub> | C) (see Note 1) | ±20 mA         |
| Continuous output current, $I_O(V_O = 0 \text{ to } V_{CC})$                                  |                 |                |
| Continuous current through V <sub>CC</sub> or GND   |                 | ±70 mA         |
| Package thermal impedance, θ <sub>JA</sub> (see Note 2)                                       |                 |                |
| -   | N package       | 67°C/W         |
|   | PW package      | 108°C/W        |
| Storage temperature range, T <sub>stq</sub>   |                 | –65°C to 150°C |

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

### recommended operating conditions (see Note 3)

|                |                                       |                         | SN   | SN54HC158 |      | SN74HC158 |     |      | UNIT |

| TA             | Operating free-air temperature        |                         | -55  |           | 125  | -40       |     | 85   | °C   |

NOTE 3: All unused inputs of the device must be held at V<sub>CC</sub> or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

NOTES: 1. The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

<sup>2.</sup> The package thermal impedance is calculated in accordance with JESD 51.

NOTES: A.  $C_L$  includes probe and test-fixture capacitance.

- B. Phase relationships between waveforms were chosen arbitrarily. All input pulses are supplied by generators having the following characteristics: PRR  $\leq$  1 MHz, Z<sub>O</sub> = 50  $\Omega$ , t<sub>f</sub> = 6 ns.
- C. The outputs are measured one at a time with one input transition per measurement.
- D. tpLH and tpHL are the same as tpd.

#### **IMPORTANT NOTICE**

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Customers are responsible for their applications using TI components.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
