SN54LS592, SN54LS593, SN74LS592, SN74LS593
8-BIT BINARY COUNTERS WITH INPUT REGISTERS

SDLS004 D2633, JANUARY 1981 – REVISED MARCH 1988

- Parallel Register Inputs ('LS592)
- Parallel 3-State I/O: Register Inputs/ Counter Outputs ('LS593)
- Counter has Direct Overriding Load and Clear
- Accurate Counter Frequency: DC to 20 MHz

description

The 'LS592 comes in a 16-pin package and consists of a parallel input, 8-bit storage register feeding an 8-bit binary counter. Both the register and the counter have individual positive-edge-triggered clocks. In addition, the counter has direct load and clear functions. A low-going $\overline{RCO}$ pulse will be obtained when the counter reaches the hex word FF. Expansion is easily accomplished for two stages by connecting $\overline{RCO}$ of the first stage to $\overline{CCKEN}$ of the second stage. Cascading for larger count chains can be accomplished by connecting $\overline{RCO}$ of each stage to CCK of the following stage.

The 'LS593 comes in a 20-pin package and has all the features of the 'LS592 plus 3-state I/O, which provides parallel counter outputs. The tables below show the operation of the enable (CCKEN, $\overline{CCKEN}$) inputs. A register clock enable ($\overline{RCKEN}$) is also provided.

OUTPUT ENABLE CONTROL ('593 ONLY)

G	$\overline{G}$	A/Q_A thru H/Q_H
L	L	input mode
L	H	input mode
H	L	output mode
H	H	input mode

COUNTER CLOCK ENABLE CONTROL

CCKEN	$\overline{CCKEN}$	EFFECT ON CCK
L	L	Enable
L	H	Disable
H	L	Enable
H	H	Enable

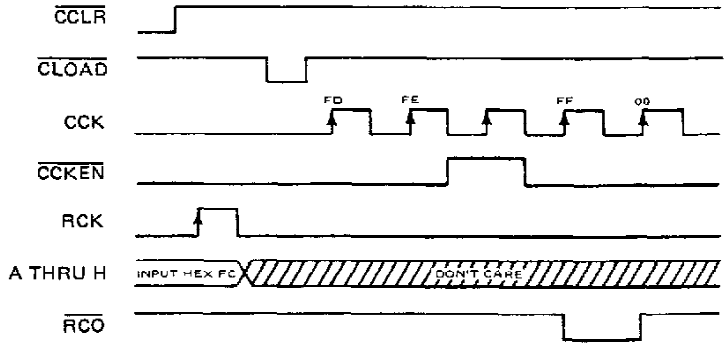
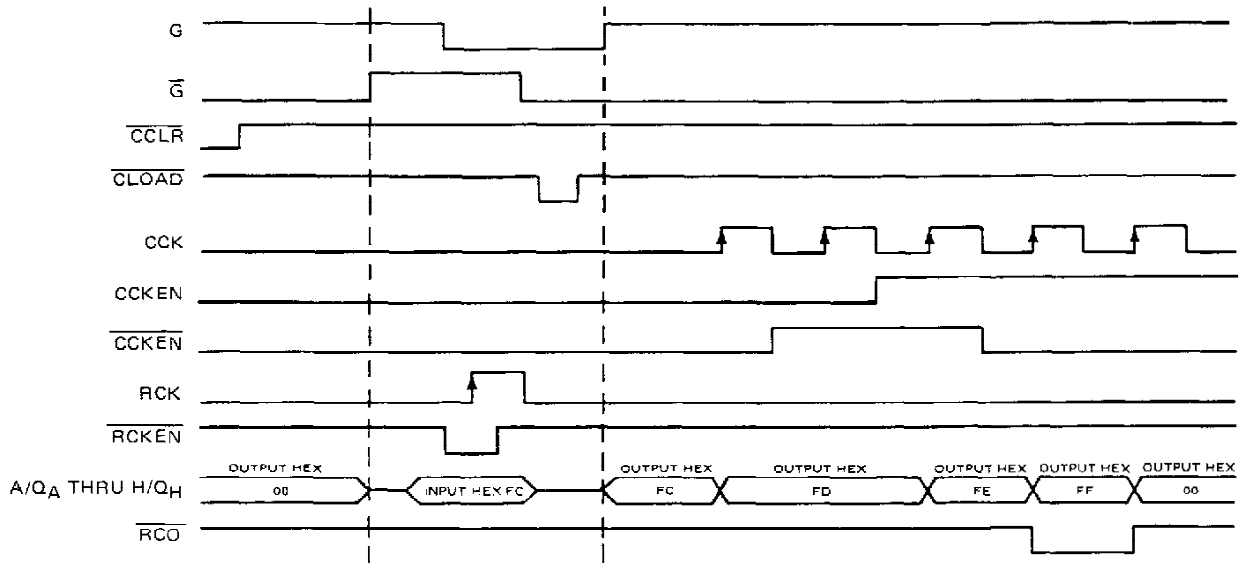
typical operating sequences

'LS592



'LS593



absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

Supply voltage, V_{CC} (see Note 1) . . . . . 7 V
Input voltage (excluding I/O ports) . . . . . 7 V
Off-state output voltage (including I/O ports) . . . . . 5.5 V
Operating free-air temperature range: SN54LS592, SN54LS593 . . . . . −55°C to 125°C
SN74LS592, SN74LS593 . . . . . 0°C to 70°C
Storage temperature range . . . . . −65°C to 150°C

NOTE 1: Voltage values are with respect to the network ground terminal.

recommended operating conditions

			SN54LS'			SN74LS'			UNIT
			MIN	NOM	MAX	MIN	NOM	MAX	
V_{CC}	Supply voltage		4.5	5	5.5	4.75	5	5.25	V
V_{IH}	High-level input voltage		2			2			V
V_{IL}	Low-level input voltage				0.7			0.8	V
I_{OH}	High-level output current	$\overline{RCO}$			−1			−1	mA
		Q 'LS593 only			−1			−2.6	
I_{OL}	Low-level output current	$\overline{RCO}$			8			16	mA
		Q 'LS593 only			12			24	
f_{CCK}	Counter clock frequency		0		20	0		20	MHz
$t_{w\,(CCK)}$	Duration of counter clock pulse		25			25			ns
$t_{w\,(\overline{CCLR})}$	Duration of counter clear pulse		20			20			ns
$t_{w\,(RCK)}$	Duration of register clock pulse		20			20			ns
$t_{w\,(\overline{CLOAD})}$	Duration of counter load pulse		40			40			ns
t_{su}	Register enable setup time	$\overline{RCKEN}$ low to RCK ↑, 'LS593	20			20			ns
t_{su}	Counter enable setup time before CCK ↑	$\overline{CCKEN}$ low, 'LS592	30			30			ns
		$\overline{CCKEN}$ low or CCKEN high, 'LS593	30			30			
t_{su}	Setup time	$\overline{CCLR}$ inactive before CCK ↑	20			20			ns
		$\overline{CLOAD}$ inactive before CCK ↑	20			20			
		RCK ↑ before $\overline{CLOAD}$ ↑ (see Note 2)	30			30			
		Data A thru H before RCK ↑	20			20			
t_h	Hold time	Data A thru H after RCK ↑	0			0			ns
		All others	0			0			
T_A	Operating free-air temperature		−55		125	0		70	°C

NOTE 2: This time insures the data saved by RCK ↑ will also be loaded into the counter.

electrical characteristics over recommended operating free-air temperature range (unless otherwise noted)

NOTE 3: Load circuits and voltage waveforms are shown in Section 1.

IMPORTANT NOTICE

Texas Instruments (TI) reserves the right to make changes to its products or to discontinue any semiconductor product or service without notice, and advises its customers to obtain the latest version of relevant information to verify, before placing orders, that the information being relied on is current.

TI warrants performance of its semiconductor products and related software to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("Critical Applications").

TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, INTENDED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT APPLICATIONS, DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS.

Inclusion of TI products in such applications is understood to be fully at the risk of the customer. Use of TI products in such applications requires the written approval of an appropriate TI officer. Questions concerning potential risk applications should be directed to TI through a local SC sales office.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards should be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein. Nor does TI warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used.

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH, PERSONAL INJURY, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE ("CRITICAL APPLICATIONS"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design.
