

DESCRIPTION

The M50194AP is a digital reverberation IC fabricated with silicon-gate CMOS technology.

The M50194AP can mix each five delays and there delays can make reverberation of church or bathroom. And so the M50194AP is an one chip of needing of reverberation, includes an A-D, D-A converter (ADM) and memory that can be obtained a reverb system.

FEATURES

- Includes an A-D, D-A converter (Adaptive Delta Modulation), two low pass filters and a 20K-bit SRAM.
- Low noise, Low distortion
 - Surround mode: Noise(-90dBV typ), Distortion(0.3% typ)
 - Echo mode : Noise(-90dBV typ), Distortion(1.8% typ)
- Delay times :
 - ① Surround mode 4.1~41.0 msec (eight steps)
 - ② Echo mode 20.5~163.8 msec (eight steps)
 - ③ Reverb mode Short mode and long mode (five lines)
- Delay time and mode can be controlled by μ -COM or manual setting
- Includes auto mute circuit to protect sound from digital noise caused by delay time mode change or power supply
- Two control modes can be selected for delay time and mode setting, easy mode control by 5-bit parallel data and μ -COM mode control by serial data.
- Includes auto reset circuit

PIN CONFIGURATION (TOP VIEW)

| | | | |
|-----------------|----|----|----------|

(Delay times show.....Long mode operation)

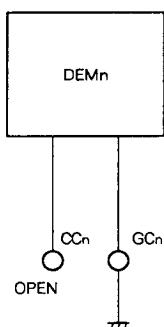

DIGITAL REVERBERATION

5. DEMODULATOR SELECTION

Demodulator and Delay Time (msec) diagram

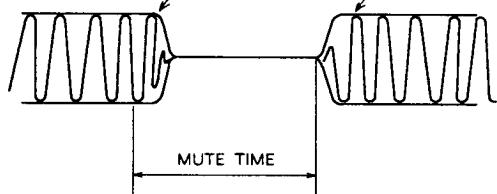

(fck = 4.0MHz) (.: msec)

| Demodulator | Surround mode | Echo mode | Reverb mode | |
|-------------|---------------|------------|-------------|-------|
| | | | Short | Long |
| DEM1 | - | - | 81.9 | 163.8 |
| DEM2 | 4.1~41.0 | 20.5~163.8 | 49.2 | 98.3 |
| DEM3 | - | - | 61.4 | 122.9 |
| DEM4 | - | - | 69.6 | 139.3 |
| DEM5 | - | - | 41.0 | 81.9 |

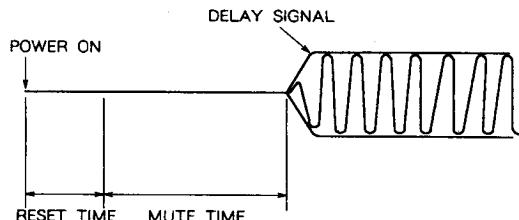

MUTING

DELAY SIGNAL BEFORE MODE CHANGE DELAY SIGNAL AFTER MODE CHANGE

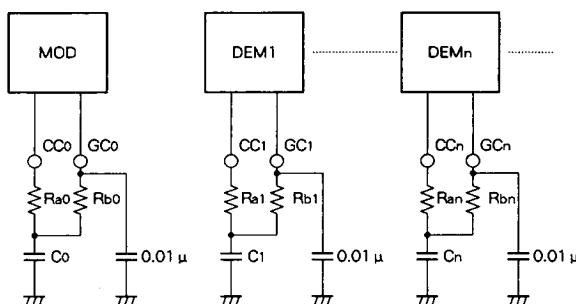

Waveforms of the signal re-initialized after change of delay time mode

Waveforms of the signal initialized at power-on

6. GAIN ADJUSTMENT

| Pin name | Mute mode | Mute time (msec) |
|----------|-------------|------------------|
| MODE1 | Surround | 132.0 |
| L | Reverb echo | 525.0 |

$$A_n = \frac{R_{b0}}{R_{bn}}$$

$$R_{an} = \frac{R_{bn}}{10}$$

$$C_n = A_n \cdot C_0$$

ex

$$R_{b0} = 7.5k\Omega$$

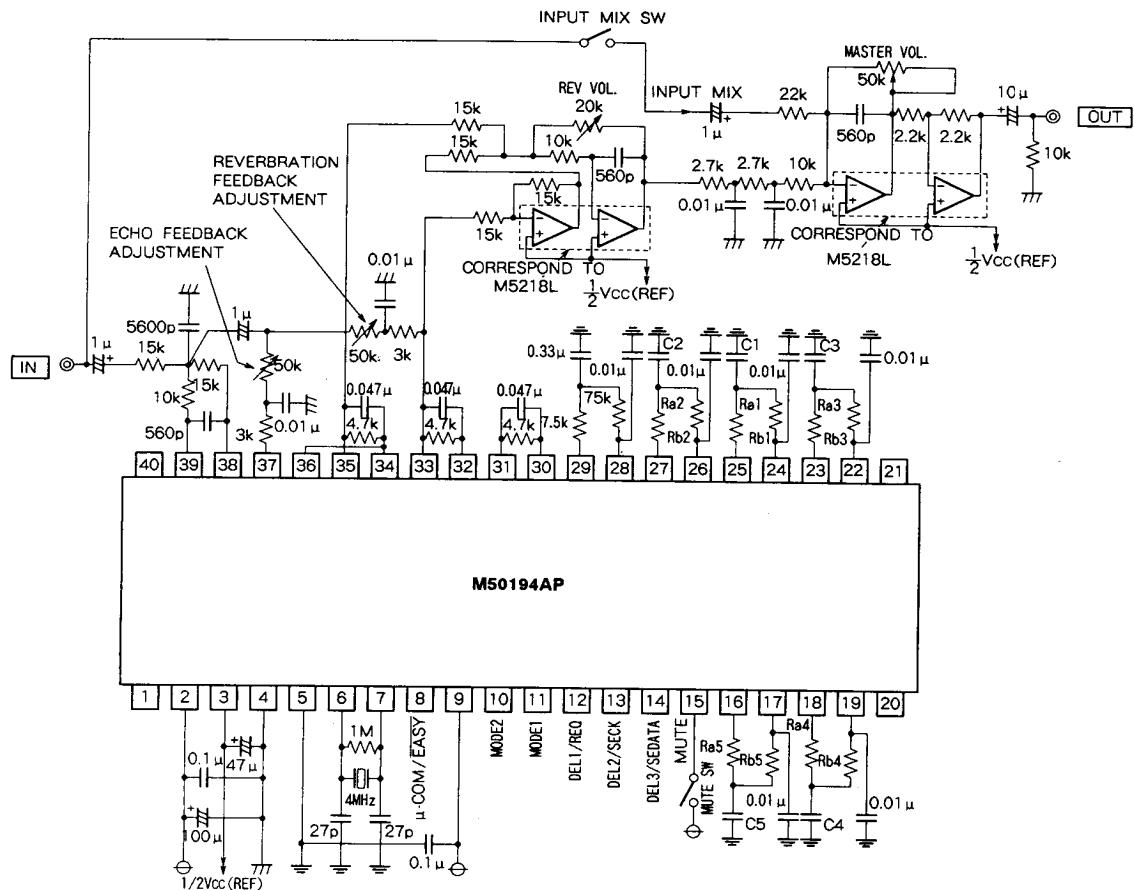

$$R_{bn} = 75k\Omega$$

$$C_0 = 0.33\mu F$$
