

CHROMA SIGNAL HUE TINT CONTROLLER

■ GENERAL DESCRIPTION

NJM2255 is a Chroma signal Hue, Tint controller IC, to be used for VCR, LCD & AV equipments.

In play back operation of video signals of VCRs, Hue and Tint of Chroma signal can be adjusted independently and continuously by the external DC voltage. NJM2255 internalizes the variable capacitor in it, so that it can be operated with minimal external components.
