

ICs for VCR

**Panasonic**

# AN3328S

**2-head recording and playback amplifier IC (A2) for HiFi VCR****■ Overview**

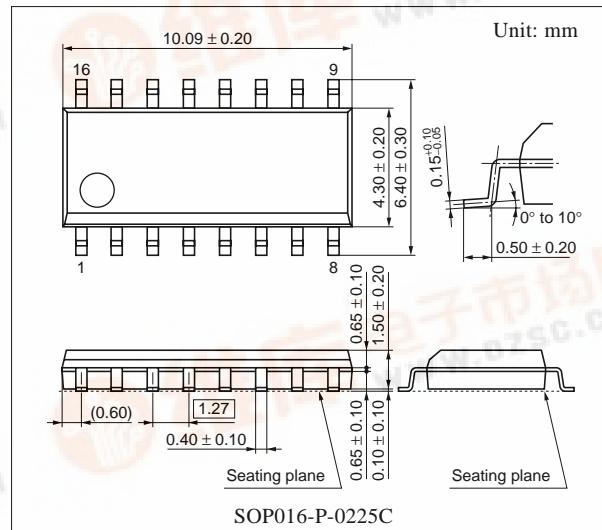

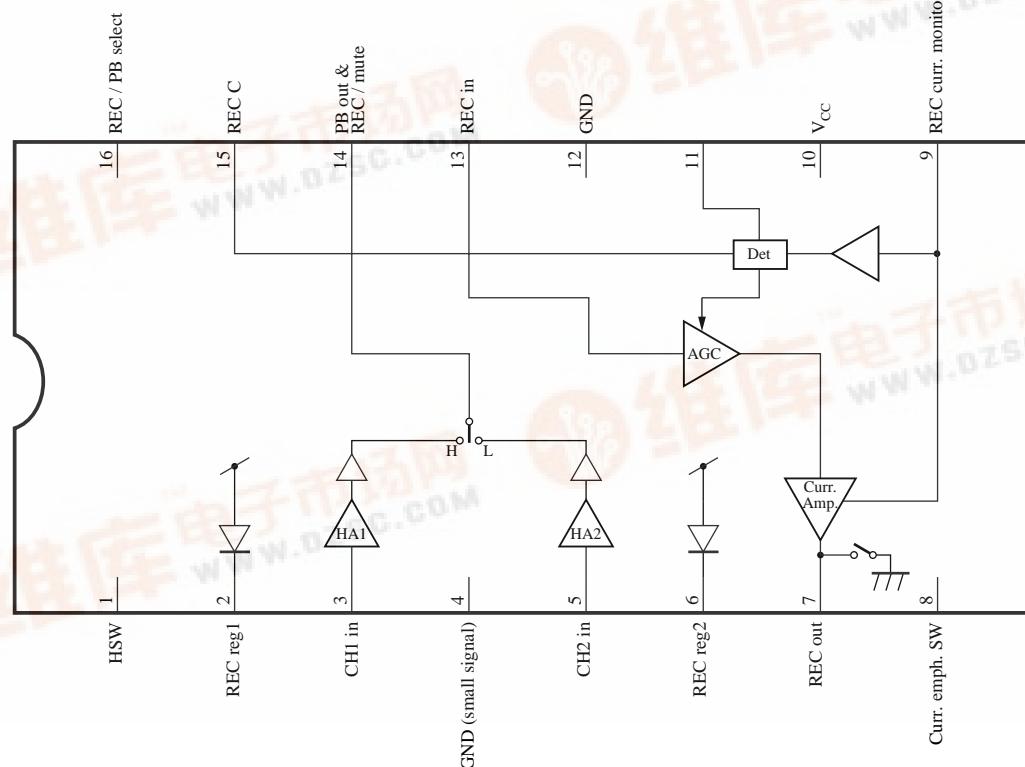

The AN3328S is a 2-head recording and playback amplifier IC for HiFi audio, and realized reduction of pin numbers. The package is a small outline of 16 pins, 1.27 mm pitch and supply voltage is 5 V of single supply.

**■ Features**

- Damping-less amp. in playback system
- No adjustment of recording current by AGC
- 3-step switchover of recording current level with the current emphasis switch (typ.  $\pm 1.8$  dB)

**■ Applications**

- HiFi VCR

**■ Block Diagram**

### ■ Pin Descriptions

| Pin No. | Description          | Pin No. | Description                 |
|---------|----------------------|---------|-----------------------------|
| 1       | Audio head SW        | 9       | REC curr. monitor (control) |
| 2       | REC regulator1       | 10      | V <sub>CC</sub>             |
| 3       | Head amp. input ch.1 | 11      | REC AGC det                 |
| 4       | GND (small signal)   | 12      | GND                         |
| 5       | Head amp. input ch.2 | 13      | REC input                   |
| 6       | REC regulator2       | 14      | PB out & REC / mute SW      |
| 7       | REC out              | 15      | REC C                       |
| 8       | Curr. emph. SW       | 16      | REC/PB select SW            |

### ■ Absolute Maximum Ratings

| Parameter                                   | Symbol           | Rating      | Unit |
|---|------------------|-------------|------|
| Supply voltage                              | V <sub>CC</sub>  | 6           | V    |
| Supply current                              | I <sub>CC</sub>  | —           | mA   |
| Power dissipation <sup>*2</sup>             | P <sub>D</sub>   | 240         | mW   |
| Operating ambient temperature <sup>*1</sup> | T <sub>opr</sub> | -20 to +70  | °C   |
| Storage temperature <sup>*1</sup>           | T <sub>stg</sub> | -55 to +125 | °C   |

Note) \*1: Except for the operating ambient temperature and storage temperature, all ratings are for T<sub>a</sub> = 25°C.

\*2: The power dissipation shown is for the IC package in free air at T<sub>a</sub> = 70°C.

### ■ Recommended Operating Range

| Parameter      | Symbol          | Range      | Unit |
|----------------|-----------------|------------|------|
| Supply voltage | V <sub>CC</sub> | 4.5 to 5.5 | V    |

■ Electrical Characteristics at  $T_a = 25^\circ\text{C}$ 

| Parameter  | Symbol                          | Conditions   | Min  | Typ    | Max      | Unit                    |
