

# AN5165K

## A Single Chip IC for NTSC Color-TV

### ■ Overview

The AN5165K is an IC in which all of the NTSC system color television signal processing circuits are integrated on a single chip. The rationalization of set production line can be realized by this IC incorporating I<sup>2</sup>C bus interface.

### ■ Features

- Built-in video IF circuit, sound IF circuit, video signal processing circuit, color signal processing circuit, deflection correction circuit and sync. signal processing circuit
- Built-in I<sup>2</sup>C bus interface

### ■ Applications

- TVs
