## Data Sheet

## Description

The ASSR-40xC Series is specifically designed for fast switching applications, commonly found in the test and measurement systems. The low $C \times R$ and low output offstate leakage current provide higher system throughput and reduce system errors.

The dual channel configuration of ASSR-402C is equivalent to 2 Form A Electromechanical Relays (EMR). One channel of the relay consists of an AIGaAs infrared light-emitting diode (LED) input stage optically coupled to a high-voltage output detector circuit. The detector consists of a high-speed photovoltaic diode array and driver circuitry to switch on/off two discrete high voltage MOSFETs. The relay turns on (contact closes) with a minimum input current of 1 mA through the input LED. The relay turns off (contact opens) with an input voltage of 0.8 V or less.

ASSR-401C is available in 4-pin SO package and ASSR402C is available in 8-pin DIP and Gull Wing Surface Mount packages. Their electrical and switching characteristics are specified over the temperature range of $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.

## Functional Diagram

1 Form A in 4-Pin SO Package

## Features

- Compact Solid-State Bi-directional Signal Switch
- Single and Dual Channel Normally-off Single-Pole-Single-Throw (SPST) Relay
- 400V Output Withstand Voltage
- 0.04A Current Rating
- Low Input Current: $I_{F}=1 \mathrm{~mA}$
- Low Cx R: 650pF• $\Omega$ typical
- Low Output Off-state Leakage Current: 0.3nA typical
- Fast Speed Switching: 0.08 ms (Ton), 0.05 ms (Toff) typical
- High Transient Immunity: > $\mathrm{kV} / \mu \mathrm{s}$
- High Input-to-Output Insulation Voltage (Safety and Regulatory Approvals Pending)
- 3750 Vrms for 1 min per UL1577
- CSA Component Acceptance

## Applications

- Automatic Test Equipment
- Data Acquisition System
- Datalogger and Recorder
- Multiplexer
- Measuring Instrument
- EMR / Reed Relay Replacement

## Ordering Information

ASSR-xxxx is UL Recognized with 3750 Vrms for 1 minute per UL1577 and is approved under CSA Component Acceptance Notice \#5, File CA 88324.

To order, choose a part number from the part number column and combine with the desired option from the option column to form an order entry.
Example 1:
ASSR-401C-503E to order product of Surface Mount SO-4 package in Tape and Reel packaging and RoHS Compliant.
Example 2:
ASSR-402C-002E to order product of 300 mil DIP-8 package in tube packaging and RoHS Compliant.
Option datasheets are available. Contact your Avago sales representative or authorized distributor for information.

## Regulatory Information

The ASSR-401C and ASSR-402C are pending approval by the following organizations:
UL
Pending approval under UL 1577, component recognition program up to $\mathrm{V}_{\text {ISO }}=3750 \mathrm{~V}_{\mathrm{RMS}}$
CSA
Pending approval under CSA Component Acceptance Notice \#5.

Notes:

1. For qualified device performance over temperature range, it is recommended to operate at $\mathrm{I}_{\mathrm{F}}=5 \mathrm{~mA}$.
2. Device is considered as a two terminal device: pins $1,2,3$ and 4 shorted together and pins $5,6,7$ and 8 shorted together.
3. The Input-Output Momentary Withstand Voltage is a dielectric voltage rating that should not be interpreted as an input-output continuous voltage rating. For the continuous voltage rating refer to the IEC/EN/DIN EN 60747-5-2 Insulation Characteristics Table (if applicable), your equipment level safety specification, or Avago Technologies Application Note 1074, "Optocoupler Input-Output Endurance Voltage."
4. The PCB design and environmental conditions are taken into consideration when measuring the lo(OFF) performance.
5. During the pulsed $R_{(O N)}$ measurement ( $l_{0}$ duration $\leq 30 \mathrm{~ms}$ ), ambient $\left(T_{A}\right)$ and case temperature $\left(T_{C}\right)$ are equal.
