bq2110

NiCd or NiMH Gas Gauge Module

Features

- Complete bq2010 Gas Gauge solution for NiCd or NiMH battery packs
- Battery information available over a single-wire bidirectional serial port
- Battery state-of-charge monitoring for 4- to 12-cell series applications
- On-board regulator allows direct connection to the battery
- "L" version includes push-button activated LEDs to display state-of-charge information
- Nominal capacity and cell chemistry pre-configured
- Compact size for battery pack integration

General Description

The bq2110 Gas Gauge Module provides a complete and compact solution for capacity monitoring of NiCd and NiMH battery packs. Designed for battery pack integration, the bq2110 incorporates a bq2010 Gas Gauge IC, a current sense resistor, and all other components necessary to accurately monitor and display the capacity of 4 to 12 series cells. The bq2110L includes six surface-mounted LEDs to display remaining capacity in 20% increments of the learned capacity (relative mode) or programmed capacity (absolute mode). The sixth LED is used in absolute mode to represent an overfull condition (charge above the programmed capacity). The LEDs are activated with the onboard push-button switch.

Contacts are provided on the bq2110 for direct connection to the battery stack (BAT+, BAT-), the serial communications port (DQ), and the empty indicator (EMPTY). Please refer to the bq2010 data sheet for the specifics on the operation of the Gas Gauge.

Unitrode configures the bq2110 based on the information requested in Table 1. The configuration defines the number of series cells, the nominal battery pack capacity, the self-discharge rate, and the LED display mode.

A module development kit is also available for the bq2110. The bq2110B-KT or bq2110LB-KT includes one configured module and the following:

- 1) An interface board that allows connection to the serial port of an AT-compatible computer.
- 2) Menu-driven software with the bq2110 to display charge/discharge activity and to allow user interface to the bq2010 from any standard DOS PC.
- 3) Source code for the TSR.

Pin Descriptions

P1	DQ/Serial communication port
P2	BAT+/Battery positive/pack positive
P3	No connect
P4	EMPTY/Empty indicator output
P5	GND/Ground
P6	PACK-/Pack negative
P7	BAT-/Battery negative

Absolute Maximum Ratings

Symbol	Parameter	Minimum	Maximum	Unit	Conditions
VCC	Relative to VSS	-0.3	+7.0	V	bq2010
All other pins	Relative to VSS	-0.3	+7.0	V	bq2010
PSR	Continuous sense resistor power dissipation	-	3	W	Thru-hole sense resistor
		-	1	W	Surface mount sense resistors
ICHG	Continuous charge/discharge current	-	3.0	A	
TOPR	Operating temperature	0	+70	°C	Commercial
TSTR	Storage temperature	-40	+85	°C	

Note: Permanent device damage may occur if **Absolute Maximum Ratings** are exceeded. Functional operation should be limited to the Recommended DC Operating Conditions detailed in this data sheet. Exposure to conditions beyond the operational limits for extended periods of time may affect device reliability.

DC Electrical Characteristics (T_A = TOPR)

Symbol	Parameter	Minimum	Typical	Maximum	Unit	Conditions/Notes
NumCell	Number of series cells in battery pack	4	-	12	-	
BAT+	Positive terminal of pack	GND	NumCell * 1.2V	NumCell * 1.8V	V	
BAT-	Negative terminal of pack	GND - 0.3	-	GND+2.0	V	
ICC	Supply current at BAT+ terminal (no external loads)	-	200	300	μA	
RDQ	Internal pull-down	500k	-	-	Ω ¹	
IOL	Open-drain sink current DQ, EMPTY	-	-	5.0	mA ¹	
VOL	Open-drain output low, DQ, EMPTY	-	-	0.5	V ¹	I _{OL} < 5mA
VIHQ	DQ input high	2.5	-	-	V ¹	
VILDQ	DQ input low	-	-	0.8	V ¹	
VOS	Voltage offset	-	-	150	μV ¹	

Note: 1. Characterized on PCB, IC 100% tested.

bq2110

DC Voltage Thresholds ($T_A = T_{OPR}$)

Symbol	Parameter	Minimum	Typical	Maximum	Unit	Notes
VEDVF	Final empty warning	0.93	0.95	0.97	V	BAT+/NumCell ¹
VEDV1	First empty warning	1.03	1.05	1.07	V	BAT+/NumCell ¹
VMCV	Maximum single-cell voltage	2.20	2.25	2.30	V	BAT+/NumCell ¹
VSRO	Sense resistor range	-300	-	+2000	mV	$V_{SR} + V_{OS}$ ²
VSQR	Valid charge	375	-	-	μ V	$V_{SR} + V_{OS}$ ^{2, 3}
VSRD	Valid discharge	-	-	-300	μ V	$V_{SR} + V_{OS}$ ^{2, 3}

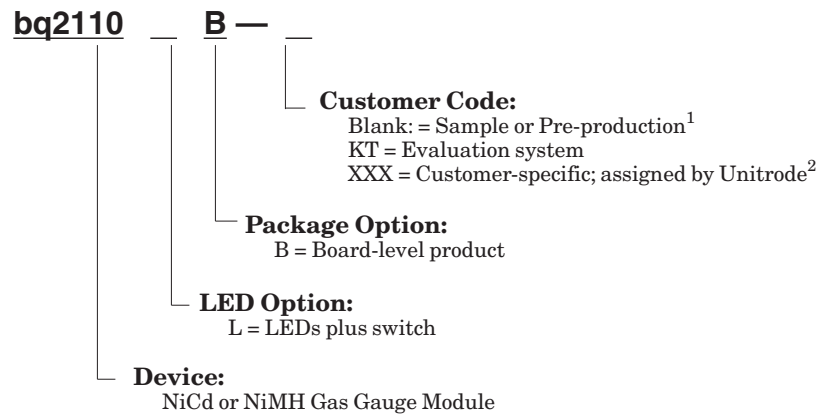

- Notes:**
1. At SB input of bq2010
 2. At SR input of bq2010.
 3. Default value; value set in DMF register.

Data Sheet Revision History

Change No.	Page No.	Description
1	2	Updated Table 1 to include 3.0A limit
1	5	Added 3.0A maximum continuous charge/discharge current specification

Note: Change 1 = May 1999 B changes from July 1996.

Ordering Information

- Notes:**
1. Requires configuration sheet (see Table 1)
 2. Example production part number: bq2110LB-001

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH, PERSONAL INJURY, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE ("CRITICAL APPLICATIONS"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
