

bq3287E/bq3287EA

Real-Time Clock (RTC) Module

Features

- ▶ Direct clock/calendar replacement for IBM® AT-compatible computers and other applications
- ▶ Functionally compatible with the DS1287/DS1287A and MC146818A/MC146818B
- ▶ 242 bytes of general nonvolatile storage
- ▶ Provides a 32.768kHz output for power management
- ▶ System wake-up capability—alarm interrupt active in battery-backup mode
- ▶ Integral lithium cell and crystal
- ▶ 160 ns cycle time allows fast bus operation
- ▶ 14 bytes for clock/calendar and control
- ▶ Time of day in seconds, minutes, and hours
 - 12- or 24-hour format
 - Optional daylight saving adjustment

- ▶ Calendar in day of the week, day of the month, months, and years with automatic leap-year adjustment
- ▶ Programmable square wave output
- ▶ Three individually maskable interrupt event flags:
 - Periodic rates from 122µs to 500ms
 - Time-of-day alarm once per second to once per day
 - End-of-clock update cycle
- ▶ Better than one minute per month clock accuracy

vided by an alarm interrupt, which is active in battery-backup mode. The bq3287EA version is identical to the bq3287E, with the addition of the RAM clear input.

The bq3287E is a fully compatible real-time clock for IBM AT-compatible computers and other applications. The bq3287E write-protects the clock, calendar, and storage registers during power failure. The integral backup energy source then maintains data and operates the clock and calendar.

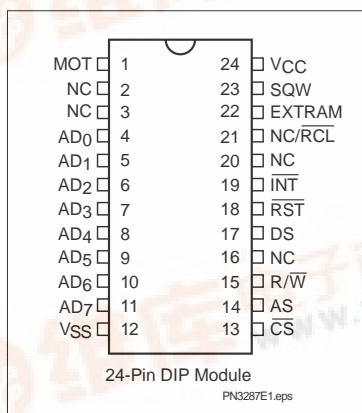

As shipped from Benchmarq, the real time clock is turned off to maximize battery capacity for in-system operation.

The bq3287E is functionally equivalent to the bq3285E, except the battery (16,20) and crystal pins (2,3) are not accessible. These pins are connected internally to a coin cell and quartz crystal. The coin cell is sized to provide 10 years of data retention and clock operation in the absence of power. For a complete description of features, operating conditions, electrical characteristics, bus timing, and pin descriptions, see the bq3285E data sheet.

General Description

The CMOS bq3287E/bq3287EA is a low-power microprocessor peripheral providing a time-of-day clock and 100-year calendar with alarm features and battery operation. Other features include three maskable interrupt sources, square-wave output, and 242 bytes of general nonvolatile storage. A 32.768kHz output is available for sustaining power-management activities. Wake-up capability is pro-

Pin Connections

Pin Names

AD0–AD7	Multiplex address/data input/output	$\overline{\text{RST}}$	Reset input
MOT		SQW	Square wave output
$\overline{\text{CS}}$	Chip select input	EXTRAM	Extended RAM enable
AS	Address strobe input	NC	No connect
DS	Data strobe input	$\overline{\text{RCL}}$	RAM clear input (bq3287EA only)
R/W	Read/write input	VCC	+5V supply
$\overline{\text{INT}}$	Interrupt request output	VSS	Ground

bq3287E/bq3287EA

Absolute Maximum Ratings

Symbol	Parameter	Value	Unit	Conditions
V _{CC}	DC voltage applied on V _{CC} relative to V _{SS}	-0.3 to 7.0	V	
V _T	DC voltage applied on any pin excluding V _{CC} relative to V _{SS}	-0.3 to 7.0	V	V _T ≤ V _{CC} + 0.3
T _{OPR}	Operating temperature	0 to +70	°C	Commercial
T _{STG}	Storage temperature	-40 to +70	°C	Commercial
T _{BIAS}	Temperature under bias	-10 to +70	°C	Commercial
T _{SOLDER}	Soldering temperature	260	°C	For 10 seconds

Note: Permanent device damage may occur if **Absolute Maximum Ratings** are exceeded. Functional operation should be limited to the Recommended DC Operating Conditions detailed in this data sheet. Exposure to conditions beyond the operational limits for extended periods of time may affect device reliability.

Recommended DC Operating Conditions (T_A = T_{OPR})

Symbol	Parameter	Minimum	Typical	Maximum	Unit
V _{CC}	Supply voltage	4.5	5.0	5.5	V
V _{SS}	Supply voltage	0	0	0	V
V _{IL}	Input low voltage	-0.3	-	0.8	V
V _{IH}	Input high voltage	2.2	-	V _{CC} + 0.3	V

Note: Typical values indicate operation at T_A = 25°C.

DC Electrical Characteristics (T_A = T_{OPR}, V_{CC} = 5V ± 10%)

Symbol	Parameter	Minimum	Typical	Maximum	Unit	Conditions/Notes
I _{LI}	Input leakage current	-	-	± 1	μA	V _{IN} = V _{SS} to V _{CC}
I _{LO}	Output leakage current	-	-	± 1	μA	AD ₀ -AD ₇ , INT and SQW in high impedance
V _{OH}	Output high voltage	2.4	-	-	V	I _{OH} = -1.0 mA
V _{OL}	Output low voltage	-	-	0.4	V	I _{OL} = 4.0 mA
I _{CC}	Operating supply current	-	7	15	mA	Min. cycle, duty = 100%, I _{OH} = 0mA, I _{OL} = 0mA
V _{SO}	Supply switch-over voltage	-	3.0	-	V	
V _{PFD}	Power-fail-detect voltage	4.0	4.17	4.35	V	
I _{RCL}	Input current when $\overline{RCL} = V_{SS}$	-	-	185	μA	Internal 30K pull-up (bq3287EA only)
I _{MOTH}	Input current when MOT = V _{CC}	-	-	-185	μA	Internal 30K pull-down
I _{EXTRAM}	Input current when EXTRAM = V _{CC}	-	-	-185	μA	Internal 30K pull-down

Note: Typical values indicate operation at T_A = 25°C, V_{CC} = 5V.

Power-Down/Power-Up Timing ($T_A = T_{OPR}$)

Symbol	Parameter	Minimum	Typical	Maximum	Unit	Conditions
t_F	V_{CC} slew from 4.5V to 0V	300	-	-	μs	
t_R	V_{CC} slew from 0V to 4.5V	100	-	-	μs	
t_{CSR}	\overline{CS} at V_{IH} after power-up	20	-	200	ms	Internal write-protection period after V_{CC} passes V_{PFD} on power-up.
t_{DR}	Data-retention and time-keeping time	10	-	-	years	$T_A = 25^\circ C$.

Note: Clock accuracy is better than ± 1 minute per month at $25^\circ C$ for the period of t_{DR} .

Caution: Negative undershoots below the absolute maximum rating of $-0.3V$ in battery-backup mode may affect data integrity.

Power-Down/Power-Up Timing

Data Sheet Revision History

Change No.	Page No.	Description	Nature of Change
1	8	Register C, bit 2	Was 0; is na (not affected)
2	2	I _{RCL} max. was 275; is now 185. Pull-down = 30K.	Value change
2	2	I _{XTMAM} max. was -75; is now -185.	Value change

Notes: Change 1 = Apr. 1994 B "Final" changes from Dec. 1993 A "Preliminary."
Change 2 = Sept. 1996 C changes from April 1994 B.

Ordering Information

PACKAGING INFORMATION

Orderable Device	Status ⁽¹⁾	Package Type	Package Drawing	Pins	Package Qty	Eco Plan ⁽²⁾	Lead/Ball Finish	MSL Peak Temp ⁽³⁾
BQ3287EAMT	ACTIVE			0	1	None	Call TI	Call TI
BQ3287EMT	ACTIVE			0	1	None	Call TI	Call TI

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBsolete: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - May not be currently available - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

None: Not yet available Lead (Pb-Free).

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Green (RoHS & no Sb/Br): TI defines "Green" to mean "Pb-Free" and in addition, uses package materials that do not contain halogens, including bromine (Br) or antimony (Sb) above 0.1% of total product weight.

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
