－3－State Outputs Drive Bus Lines or Buffer Memory Address Registers
－Package Options Include Plastic Small－Outline（SOIC）and Shrink Small－Outline（SSOP）Packages，Ceramic Chip Carriers，and Plastic and Ceramic DIPs

## description

These octal buffers and line drivers are designed specifically to improve both the performance and density of 3－state memory address drivers，clock drivers，and bus－oriented receivers and transmitters．Taken together with the＇ F 240 and ＇F241，these devices provide the choice of selected combinations of inverting and noninverting outputs，symmetrical $\overline{\text { OE }}$（active－low output－enable）inputs，and complementary OE and $\overline{\mathrm{OE}}$ inputs．
The＇F244 is organized as two 4－bit buffers／line drivers with separate output enable（ $\overline{\mathrm{OE}}$ ）inputs． When $\overline{O E}$ is low，the device passes data from the A inputs to the $Y$ outputs．When $\overline{O E}$ is high，the outputs are in the high－impedance state．
The SN74F244 is available in Tl＇s shrink small－outline package（DB），which provides the same I／O pin count and functionality of standard small－outline packages in less than half the printed－circuit－board area．
The SN54F244 is characterized for operation over the full military temperature range of $-55^{\circ} \mathrm{C}$ to $125^{\circ} \mathrm{C}$ ．The SN74F244 is characterized for operation from $0^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ ．

FUNCTION TABLE
（each buffer）

| INPUTS |  | OUTPUT |
| :---: | :---: | :---: |
| $\overline{\mathrm{OE}}$ | $\mathbf{A}$ | Y |
| L | $H$ | $H$ |
| $L$ | $L$ | $L$ |
| $H$ | $X$ | $Z$ |

## logic symbol $\dagger$

$\dagger$ This symbol is in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12.

## logic diagram (positive logic)

## absolute maximum ratings over operating free-air temperature range (unless otherwise noted) $\ddagger$

Input voltage range, $\mathrm{V}_{\mathrm{I}}$ (see Note 1) ............................................................ -1.2 V to 7 V

Voltage range applied to any output in the disabled or power-off state $\ldots \ldots . . . . . . . . . .$.

Current into any output in the low state: SN54F244 ..................................................... 96 mA
SN74F244 .................................................... 128 mA
Operating free-air temperature range: SN54F244 ......................................... $-55^{\circ} \mathrm{C}$ to $125^{\circ} \mathrm{C}$
SN74F244 ................................................. . $0^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$
Storage temperature range ......................................................................... $-65^{\circ} \mathrm{C}$ to $150^{\circ} \mathrm{C}$
$\ddagger$ Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
NOTE 1: The input voltage ratings may be exceeded provided the input current ratings are observed.
recommended operating conditions

|  |  | SN54F244 |  |  | SN74F244 |  |  | UNIT |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

${ }^{(1)}$ The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.
${ }^{\text {(2) }}$ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS \& no $\mathrm{Sb} / \mathrm{Br}$ ) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb -Free/Green conversion plan has not been defined.
Pb-Free (RoHS): Tl's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed $0.1 \%$ by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb -Free products are suitable for use in specified lead-free processes.
Green (RoHS \& no $\mathbf{S b} / \mathrm{Br}$ ): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine ( Br ) and Antimony ( Sb ) based flame retardants ( Br or Sb do not exceed $0.1 \%$ by weight in homogeneous material)
${ }^{(3)}$ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall Tl's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

J ( $\mathrm{R}-\mathrm{GDIP}-\mathrm{T} * *$ )
CERAMIC DUAL IN-LINE PACKAGE
14 LEADS SHOWN

NOTES: A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. This package is hermetically sealed with a ceramic lid using glass frit.
D. Index point is provided on cap for terminal identification only on press ceramic glass frit seal only.
E. Falls within MIL STD 1835 GDIP1-T14, GDIP1-T16, GDIP1-T18 and GDIP1-T20.

W (R-GDFP-F20)
CERAMIC DUAL FLATPACK

4040180-4/D 07/03
NOTES: A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. This package can be hermetically sealed with a ceramic lid using glass frit.
D. Index point is provided on cap for terminal identification only.
E. Falls within Mil-Std 1835 GDFP2-F20

FK (S-CQCC-N**)

NOTES: A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. This package can be hermetically sealed with a metal lid.
D. The terminals are gold plated.
E. Falls within JEDEC MS-004

NOTES: A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.

C Falls within JEDEC MS-001, except 18 and 20 pin minimum body length ( $\operatorname{Dim} A$ ).
(D) The 20 pin end lead shoulder width is a vendor option, either half or full width.

DW (R-PDSO-G20)
PLASTIC SMALL-OUTLINE PACKAGE

NOTES: A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. Body dimensions do not include mold flash or protrusion not to exceed $0.006(0,15)$.
D. Falls within JEDEC MS-013 variation AC.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Tl's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with Tl's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
