Ceramic Filters (CERAFIL®) for FM Receivers

CERAMIC FILTERS (CERAFIL®)

GLOBAL PART NUMBERS
JUNE 2001

muRata Innovator in Electronics

Murata
Manufacturing Co., Ltd.

Cat.No.P61E-7

Please read CAUTION and Notice in this catalog for safety. This catalog has only typical specifications. Therefore you are requested to approve our product specification or to transact the approval sheet for product specification, before your ordering.

P61E7.pdf 01.10.17

CONTENTS

● Part Numbering (The structure of the "Global Part Numbers" that have been adopted since June 2001 and the meaning of each code are described herein. If you have any questions about details, inquire at your usual Murata sales office or distributor.)

CERAFIL® for FM

(Global Part Number) **SF** ❶ **E** ❷ **LA** ❸ **10M7** ❹ **FAA0** ❺ **-R0** ❻

❶Product ID

Product ID	
SF	Ceramic Filters

❷Oscillation/Numbers of Element

Code	Oscillation/Numbers of Element
E	2 Elements Thickness Expander mode
T	3 Elements Thickness Expander mode
K	2 Elements Thickness Expander mode (2nd Harmonic)
V	2 Elements Thickness Expander mode (3rd Over Tone)

❸Structure/Size

Code	Structure/Size
L□	Lead Type
C□	Chip Type

□ is expressed "**A**" or subsequent code, which indicates the size.

❹Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (MHz). Decimal point is expressed by capital letter "**M**".

❺Product Specification

Code	Product Specification
FAA0	Four-digit alphanumerics express pass-bandwidth, center frequency tolerance, rank, series, others.

❻Packaging

Code	Packaging
-B0	Bulk
-R0	Plastic Taping ø180mm
-R1	Plastic Taping ø330mm
-A0	1500pcs. /Radial Taping H_0=18mm
-A1	1000pcs. /Radial Taping H_0=18mm

Radial taping is applied to lead type and plastic taping to chip type. With non-standard products, two-digit alphanumerics indicating "Individual Specification" is added between "❺Product Specification" and "❻Packaging".

Discriminators for FM

(Global Part Number) **CD** ❶ **A** ❷ **LA** ❸ **10M7** ❹ **GA** ❺ **001** ❻ **-R0** ❼

❶Product ID

Product ID	
CD	Discriminators

❷Oscillation

Code	Oscillation
A	Thickness Expander mode

❸Structure/Size

Code	Structure/Size
L□	Lead Type
C□	Chip Type

□ is expressed "**A**" or subsequent code, which indicates the size.

❹Nominal Center Frequency

Expressed by four-digit alphanumerics . The unit is in hertz (MHz). Decimal point is expressed by capital letter "**M**".

❺Product Specification

Code	Product Specification
GA	Two-digit alphanumerics express type, center frequency, rank, others

❻IC

Code	IC
001	Applicable IC Control Code

❼Packaging

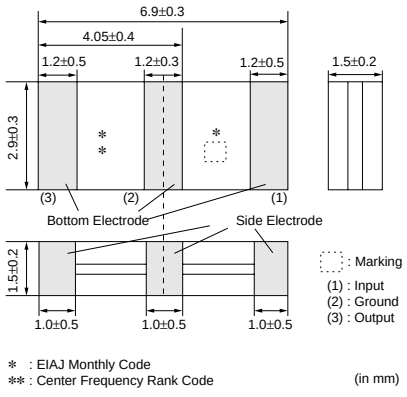
Code	Packaging
-B0	Bulk
-A0	Radial Taping H_0=18mm
-R0	Plastic Taping (ø180mm)
-R1	Plastic Taping (ø330mm)

Radial taping is applied to lead type and plastic taping to chip type. With non-standard products, an alphanumerics indicating "Individual Specification" is added between "❻IC" and "❼Packaging".

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Chip Type SFECV Series

SFECV10M7 series for FM-receivers are monolithic type ceramic filters which utilize the energy trapped thickness vibration-mode of the piezoelectric ceramic. By taking advantage of the very low profile, new SFECV series and PFWCC(kHz filter for AM receiver) enable costomers to make AM/FM set so thin, and it can be of help to the total chip circuit.



■ Features

1. Super-thin. Only 1.5mm. The most suitable ceramic filter available for thinning substrates.
2. Heat resistant. Reflow soldering can be performed because of its excellent heat resistance.
3. Piezoelectric element is connected in the sandwich shape by heat resistant substrate, thus it has excellent mechanical strength, and it is suitable for automatic mounting.
4. Various bandwidths are available. Select a suitable type in accordance with the desired selectivity.
5. Electrical characteristics are the same as conventional "CERAFIL".

■ Applications

1. Small, thin radios
2. Automotive radios
3. Headphone steros

Part Number	Center Frequency (fo) (MHz)	3dB Bandwidth (kHz)	Attenuation (kHz)	Insertion Loss (dB)	Spurious Attenuation (dB)
SFECV10M7KA00-R0	10.700 ±30kHz	within110 ±30kHz	320 max.	within6.0 ±2.0dB	35 min.
SFECV10M7JA00-R0	10.700 ±30kHz	within150 ±40kHz	380 max.	10.0 max.	30 min.
SFECV10M7HA00-R0	10.700 ±30kHz	within180 ±40kHz	470 max.	within4.0 ±2.0 dB	35 min.
SFECV10M7GA00-R0	10.700 ±30kHz	within230 ±50kHz	510 max.	within3.5 ±2.0 dB	35 min.
SFECV10M7FA00-R0	10.700 ±30kHz	within280 ±50kHz	590 max.	within3.0 ±2.0 dB	35 min.

Area of Attenuation : [within 20dB] Area of Spurious Attenuation : [within 9MHz to 12MHz]
Center frequency(fo) defined by the center of 3dB bandwidth.

■ Center Frequency Rank Code

CODE	30kHz Step	25kHz Step
D	10.64MHz±30kHz	10.650MHz±25kHz
B	10.67MHz±30kHz	10.675MHz±25kHz
A	10.70MHz±30kHz	10.700MHz±25kHz
C	10.73MHz±30kHz	10.725MHz±25kHz
E	10.76MHz±30kHz	10.750MHz±25kHz
Z	Combination A,B,C,D,E	
M	Combination A,B,C

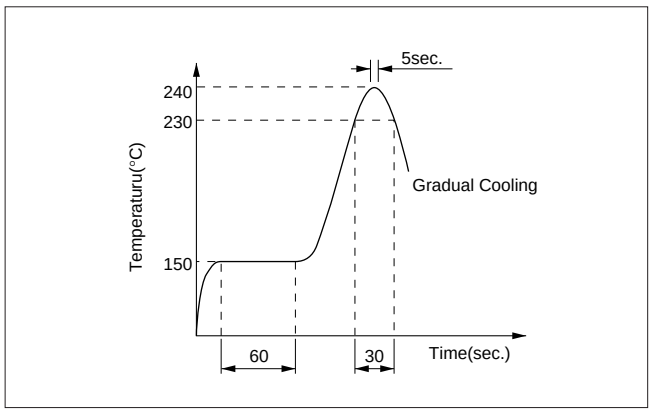
1 Chip CERAFIL® SFECV Series Notice

■ Notice (Soldering and Mounting)

1. Standard Reflow Soldering Condition

(1) Reflow



(2) Soldering Iron

Lead terminal is directly contacted with the tip of soldering iron of 280±5˚C for 3.0±0.5 seconds.

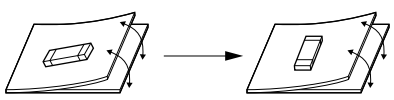
2. Wash

The component cannot be withstand washing.

■ Notice (Handling)

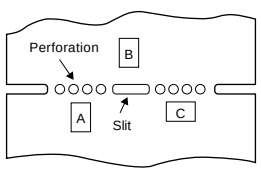
1. The component will be damaged when an excessive stress is applied.
2. The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
3. Design layout of components on the PC board to minimize the stress imposed on the warp or flexure of the board.
4. After installing chips, if solder is excessively applied to the circuit board, mechanical stress will cause destruction resistance characteristics to lower. To prevent this, be extremely careful in determining shape and dimension before designing the circuit board diagram.
5. When the positioning claws and pick up nozzle are worn, the load is applied to the chip while positioning is concentrated to one positioning accuracy, etc. Careful checking and maintenance are necessary to prevent unexpected trouble.
6. When correcting chips with a soldering iron, the tip of the soldering iron should not directly touch the chip component. Depending on the soldering conditions, the effective area of terminations may be reduced. the use of solder containing Ag should be done to prevent the electrode erosion.
7. Do not clean or wash the component as it is not hermetically sealed.
8. In case of covering filter with over coat, conditions such as material of resin, cure temperature, and so on should be evaluated well.
9. Do not use strong acidity flux, more than 0.2wt% chlorine content, in re-flow soldering.
10. Accurate test circuit values are required to measure electrical characteristics.It may be a cause of mis-correlation if there is any deviation, especially stray capacitance, from the test circuit in the specification.

[Component direction]



Put the component lateral to the direction in which stress acts.

[Component layout close to board]

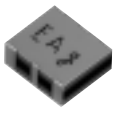


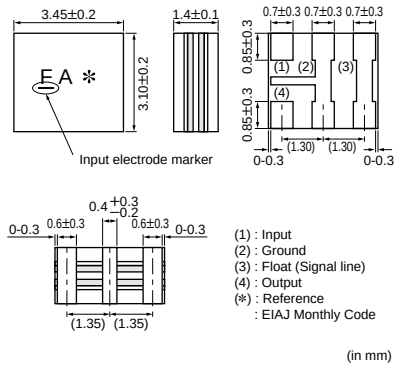
Susceptibility to stress is in the order of : A>C>B

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Small Chip Type SFECS Series

SFECS10M7 series for FM-receivers are small, high performance and super thin (1.4mm) filters.
Piezoelectric element is connected in the sandwich shape by ceramics substrate.
They have 1.4mm thickness and small mounting area. (3.5x3.1mm)
New SFECS series and PFWCC(kHz filter for AM receiver) enable customers to make AM/FM set so thin and small sized.





(in mm)

■ Features

1. The filters are mountable by automatic placers.
2. They are slim, at only 1.4mm thickness, and have a small mounting area (3.5x3.1mm) enabling flexible PCB design.
3. Various bandwidths are available. Select a suitable type in accordance with the desires selectivity.
4. Operating temperature range :
   -20 to +80 (degree C)
   Storage temperature range :
   -40 to +85 (degree C)

■ Applications

1. Small, thin radios
2. Headphone stereos

Part Number	Center Frequency (fo) (MHz)	3dB Bandwidth (kHz)	Attenuation (kHz)	Insertion Loss (dB)	Spurious Attenuation (dB)
SFECS10M7HA00-R0	10.700 ±30kHz	within180 ±40kHz	470 max.	within4.5 ±2.0 dB	30 min.
SFECS10M7GA00-R0	10.700 ±30kHz	within230 ±50kHz	510 max.	within3.5 ±2.0 dB	30 min.
SFECS10M7FA00-R0	10.700 ±30kHz	within280 ±50kHz	590 max.	within3.0 ±2.0 dB	30 min.

Area of Attenuation : [within 20dB] Area of Spurious Attenuation : [within 9MHz to 12MHz]
Center frequency(fo) defined by the center of 3dB bandwidth.

Susceptibility to stress is in the order of : A>C>B

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Standard Lead Type

SFELA10M7 series for FM-receivers are monolithic type ceramic filters which use the energy trapped thickness vibration-mode of the piezoelectric ceramic.

■ Features

1. These miniature filters have high mechanical strength.
2. Low loss, favorable waveform symmetry, and high selectivity.
3. Various band widths are available for applications in wide to narrow bands.
4. Small dispersion and stable characteristics.
5. Change in center frequency is typically within ±30ppm/(degree C) at -20 to +80 (degree C).
6. High reliability.

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Low-loss Type

SFELA10M7 series for FM-receivers are monolithic type ceramic filters which use the energy trapped thickness vibration-mode of the piezoelectric ceramic.

4

■ Features

1. Insertion loss is 1 to 1.5dB lower than conventional products. This types are useful for elevating the sensitivity of sets.
2. Small dispersion and stable characteristics.
3. Excellent shape factor of frequency response.
4. Good waveform symmetry.

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Lower Spurious Response Type

SFELA10M7 series for FM-receivers are monolithic type ceramic filters which use the energy trapped thickness vibration-mode of the piezoelectric ceramic.

■ Features

1. This type has lower spurious response compared to the standard filters.
2. This types are suitable for higher spurious suppression radio.

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Wider Band-width Type

SFELA10M7 Series for FM-receivers are monolithic type ceramic filters which use the energy trapped thickness vibration-mode of the piezoelectric ceramic.

■ Features

1. Realizes wider or narrower band characteristics not obtained by conventional ceramic filters.
2. Temperature characteristics are the best available, the same as those of Murata's conventional ceramic filters. Thus, even in the case of narrow band filters, the center frequency is stable even if temperature changes.

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Narrow Band Type

SFELA10M7LFTA/KAH0, SFVLA/SFKLA series realizes narrower band characteristics not obtained by conventional ceramic filters. Besides, low spurious and temperature characteristics is stable. This series suits for European car-audio or AM up conversion use that needs narrow band characteristics.

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® For FM -IF Tuners

SFELA10M7 series for FM-receivers are monolithic type ceramic filters which use the energy trapped thickness vibration-mode of the piezoelectric ceramic.

■ Features

1. Little dispersion of amplitude characteristics and phase characteristics (G. D. T. characteristics).
2. The SFELA10M7G_X series has G. D. T characteristics and is useful for obtaining low distortion.
   SFELA10M7F_L series, in these ceramic filters, being in harmony with flatness of G. D. T. , roundness of the amplitude and selectivity characteristics, therefore, these ceramic filters are suitable to high-grade stereo tuners. Even if mismatching condition, they can keep little distortion because of low Qm of ceramic material.
   The SFELA10M7FA0G series is based on SFELA10M7FA00/GA00/HA00, and it obtains high selectivity with low loss.
   There is little dispersion of amplitude and G. D. T. characteristics, and low distortion rate can be obtained.
3. All products are inspected for symmetry and roundness of amplitude characteristics, and the flatness of G. D. T. characteristics.

Ceramic Filters (CERAFIL®) for FM Receivers

CERAFIL® Three-Elements Type SFTLA Series

SFTLA10M7 series for FM-receivers are monolithic type ceramic filters which use the energy trapped thickness vibration-mode of the piezoelectric ceramic.

■ Features

1. It has an excellent shape factor, and it is possible to obtain 1.5 times more excellent selectivity than SFELA10M7 series (by detuning +-300 or 400kHz).
2. Good performance of spurious suppression.
3. Having the same terminal pitch as the SFELA10M7 series, it easily replaces that series.
4. By replacing two SFELA10M7 series filters with one SFTLA10M7 filter,more compact sets can be made.
5. Well-suited for 1-chip ICs.

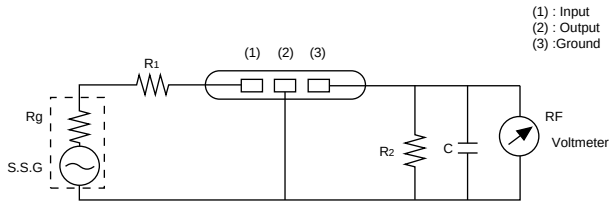
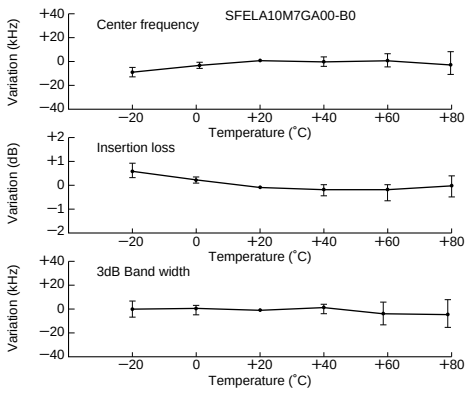
Lead Type CERAFIL® Test Circuit and Characteristics Data

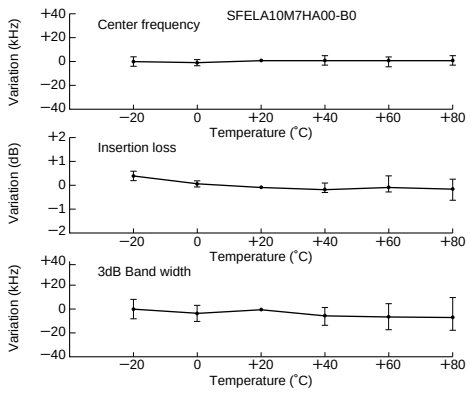
■ Test Circuit



Rg + R1 = R2 = 330Ω
C = 10pF (Including stray capacitance and input capacitance of RF voltmeter.)

■ Temperature Characteristics





■ Matching Conditions

•When using ceramic filters, it is most important to match the input/output load to impedance 330 ohm (only SFELA10M7DF00-B0 is 470 ohm matching). Waveform symmetry is damaged when reactance is added to the input/output load.

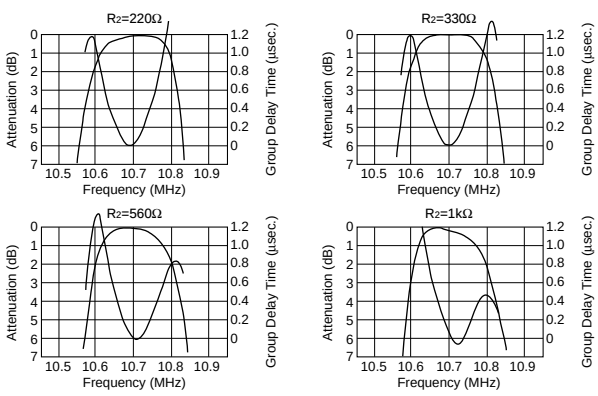
•Two ceramic filters directly connected can be used for high selelctivity. For reducing waveform variation, it is recommended to input a buffer AMP between ceramic filters.

•The SFELA10M7 and SFTLA10M7 series are of input/output symmetric structure so that in theory there is no input/output directionality. Actual circuits may use different input/output loading conditions (for example, mismatched impedance) or capacitance load. In such cases, the waveform will be a little changed by the direction of the input/output of the ceramic filters.

Lead Type CERAFIL® Characteristics Data and Notice

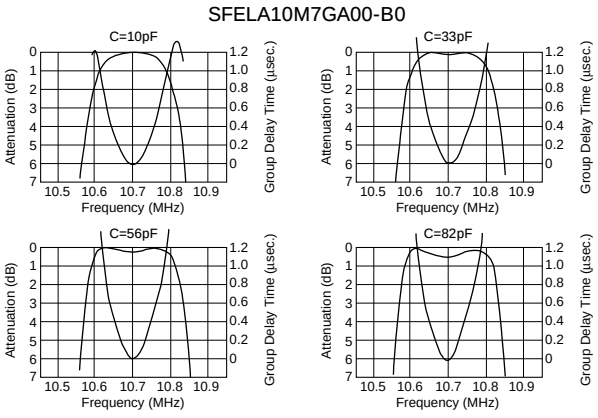
■ Loaded Resistance and Waveform (Rg+R1=330ohm)

SFELA10M7GA00-B0



■ Loaded Capacitance and Waveform (Rg+R1=R2=330ohm)

SFELA10M7GA00-B0



■ Notice (Soldering and Mounting)

The component cannot be withstand washing.

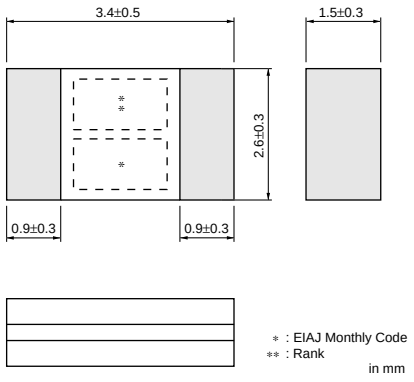
■ Notice (Handling)

1. Do not use this product with bend. The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
2. The component may be damaged when an excess stress will be applied.
3. All kinds of re-flow soldering must not be applied on the component.
4. Do not clean or wash the component as it is not hermetically sealed.
5. Do not use strong acidity flux, more than 0.2wt% chlorine content, in flow soldering.
6. In case of covering discriminator with over coat, conditions such as material of resin, cure temperature, and so on should be evaluated well.
7. Accurate test circuit values are required to measure electrical characteristics. It may be a cause of mis-correlation if there is any deviation, especially stray capacitance, from the test circuit in the specification.

Ceramic Filters (CERAFIL®) for FM Receivers

Discriminators Chip Type CDACV Series

CDACV10M7 series forms a resonator on a piezoelectric ceramic substrate. In combination with ICs, this type obtains stable demodulation characteristics in wide bandwidths.



■ Features

1. Compact and excellent mechanical strength.
2. Can be combined with various ICs. The IC is determined by the last number in the part number.
3. Stable demodulation characteristics can be obtained without adjustment.
4. The MG type for wide bandwidths and the MC type for narrow bandwidths are available.
5. Stable temperature characteristics.
6. We recommend kits : ceramic discriminator CDACV10M7 series and "CERAFIL" SFECV10M7 of the same frequency rank.

Part Number	Center Frequency (fo) (MHz)	Recovered Audio 3dB BW (kHz)	Recovered Audio Output (mV)	Distortion (%)	IC	Detection Method

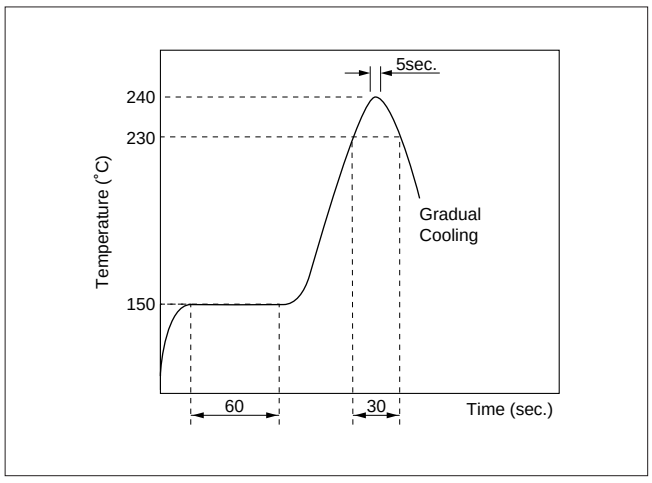
Chip Type Discriminators CDACV Series Notice

■ Notice (soldering and mounting)

1. Standard Reflow Soldering Condition

(1) Reflow



(2) Soldering Iron

Lead terminal is directly contacted with the tip of soldering iron of 280±5˚C for 3.0±0.5 seconds.

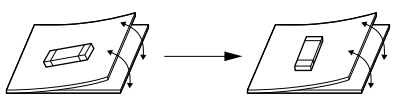
2. Wash

The component cannot be withstand washing.

■ Notice (handling)

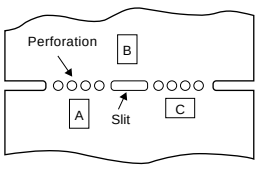
1. The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
2. Design layout of components on the PC board to minimize the stress imposed on the warp or flexure of the board.
3. After installing chips, if solder is excessively applied to the circuit board, mechanical stress will cause destruction resistance characteristics to lower. To prevent this, be extremely careful in determining shape and dimension before designing the circuit board diagram.
4. When the positioning claws and pick up nozzle are worn, the load is applied to the chip while positioning is concentrated to one positioning accuracy, etc. Careful checking and maintenance are necessary to prevent unexpected trouble.
5. When correcting chips with a soldering iron, the tip of the soldering iron should not directly touch the chip component. Depending on the soldering conditions, the effective area of terminations may be reduced. the use of solder containing Ag should be done to prevent the electrode erosion.
6. Do not clean or wash the component as it is not hermetically sealed.
7. In case of covering discriminator with over coat, conditions such as material of resin, cure temperature, and so on should be evaluated well.
8. Accurate test circuit values are required to measure electrical characteristics.
   It may be a cause of mis-correlation if there is any deviation, especially stray capacitance, from the test circuit in the specification.

[Component direction]



Put the component lateral to the direction in which stress acts.

[Component layout close to board]

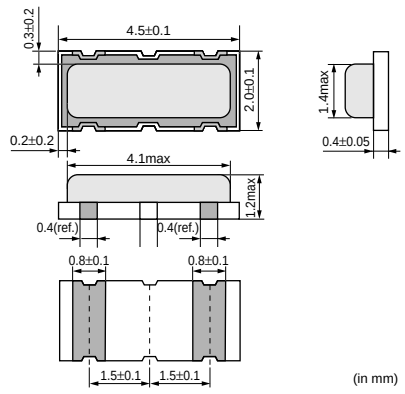


Susceptibility to stress is in the order of : A>C>B

Ceramic Filters (CERAFIL®) for FM Receivers

Discriminators Chip Low-profile Type CDSCA Series

CDSCA10M7 series forms a resonator on a piezo electric ceramic sabstrate. In combination with ICs, this type obtains stable demoduration characteristics in wide bandwidth.



■ Features

1. Compact and high reliability and recommended for automotive applications.
2. Can be combined with various ICs. The IC is determined by the last number in the part number.
3. Stable demoduration characteristics can be obtained without adjustment.
4. Stable temperature characteristics.
5. Recommended for Pb free soldering.

Part Number	Center Frequency (fo) (MHz)	Recovered Audio 3dB BW (kHz)	Recovered Audio Output (mV)	Distortion (%)	IC	Detection Method
CDSCA10M7GF107-R0	10.700 (fn)	fn±80 min.	52 min.	3.0 max.	TA31272F	Quadrature

(fn) means nominal center frequency.

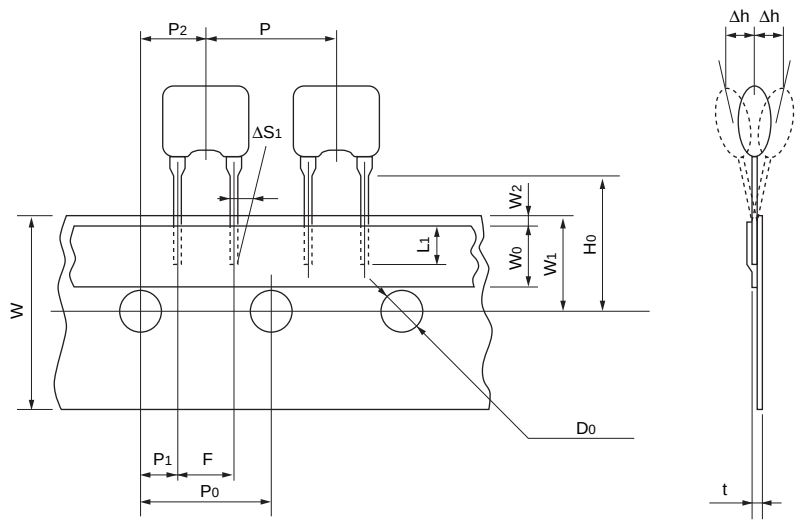
■ Lead Type Discriminator CDALA Series



Item	Code	Dimensions	Tolerance	Remarks
Lead length under the hole down tape	L_1	3.0 min.	———	
Pitch of component	P	12.7	±0.5	
Pitch of sprocket hole (1)	P_0	12.7	±0.2	
Length from hole center to lead	P_1	3.85	±0.5	
Length from hole center to component center	P_2	6.35	±0.5	
Lead spacing	F	5.0	+0.5 -0.2	
Slant to the forward or backward	Δh	0	±1.0	
Slant to the left or right	ΔS_1	0	±1.0	
Width of carrier tape	W	18.0	±0.5	
Width of hold down tape	W_0	6.0 min.	———	
Position of sprocket hole	W_1	9.0	±0.5	
Gap of hold down tape and Carrier tape	W_2	0	+0.5 -0.0	Hold down tape doesn't exceed the carrier tape
Distance between the center of sprocket hole and lead stopper	H_0	18.0	±0.5	
Diameter of sprocket hole	D_0	ø4.0	±0.2	
Total tape thickness	t	0.6	±0.2	
Pitch of sprocket hole (2)	Po20	254.0	±1.5	The pitch of 20 sprocket holes

(in mm)

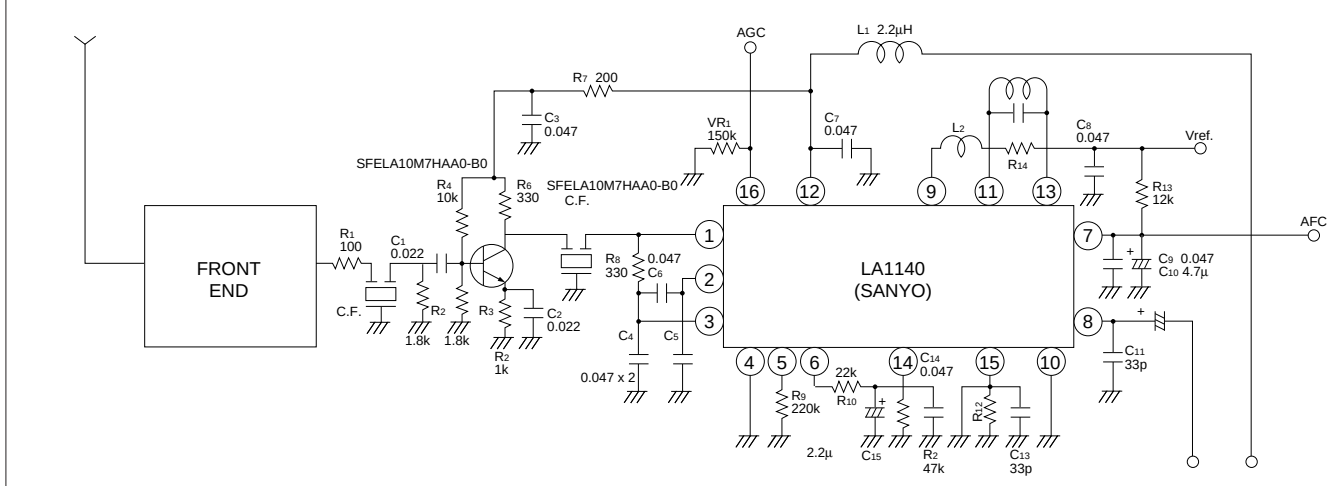
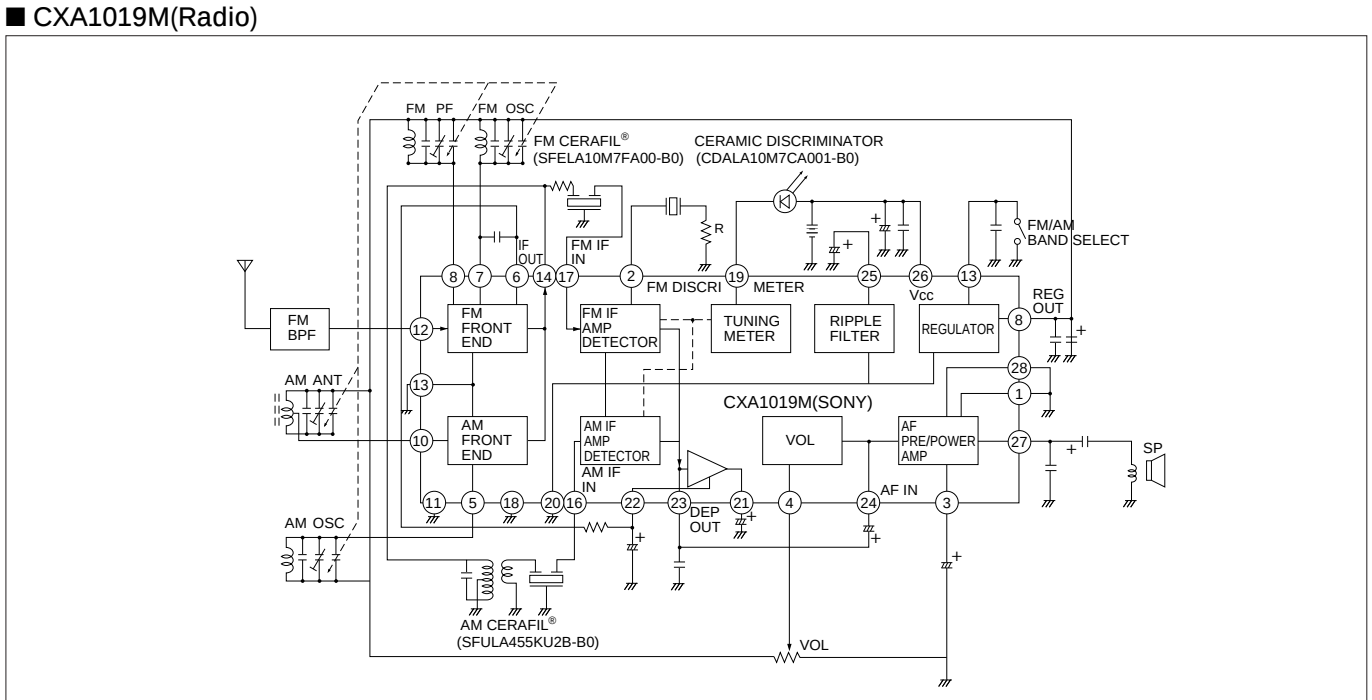
Example of Appllied Circuit

■ LA1140(Automotive Radio)



■ CXA1019M(Radio)



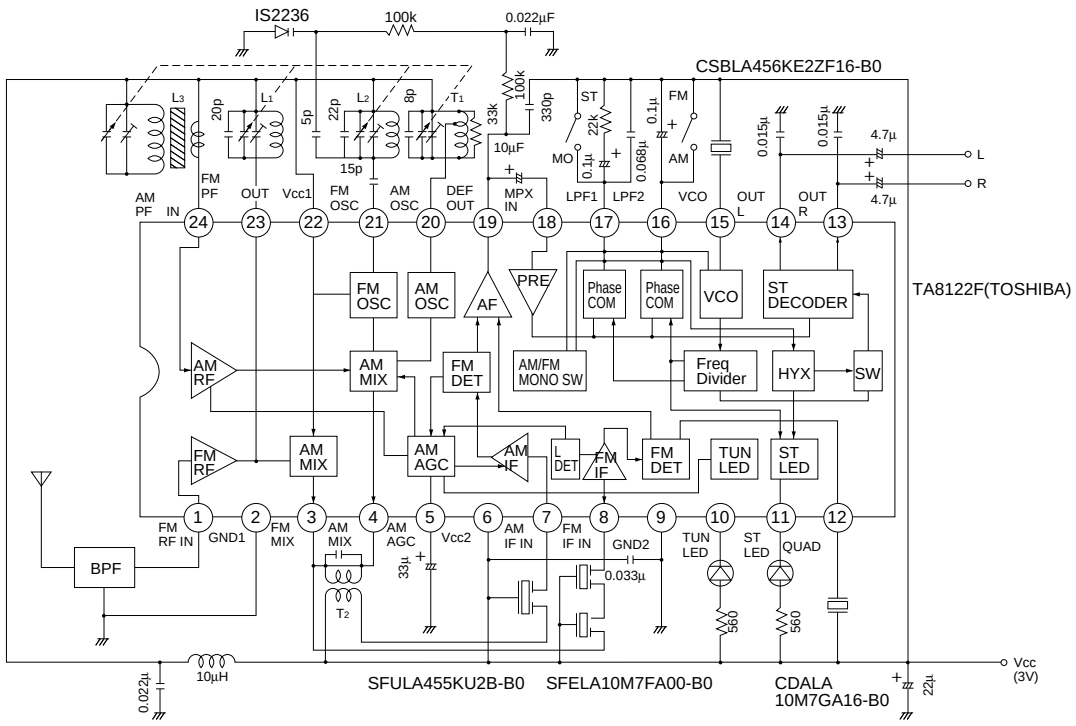
No adjustment is needed the FM detection stage due to use the ceramic discriminator.

Continued on the following page.

Example of Appllied Circuit

Continued from the preceding page.

■ TA8122F(Radio)



Detection and MPX stage adjustment ceramic discriminator and ceramic resonator (CERALOCK®)

Please read CAUTION and Notice in this catalog for safety. This catalog has only typical specifications. Therefore you are requested to approve our product specification or to transact the approval sheet for product specification, before your ordering.

⚠Note:

1. Export Control
   〈For customers outside Japan〉
   Murata products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons (nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.
   〈For customers in Japan〉
   For products which are controlled items subject to the “Foreign Exchange and Foreign Trade Law” of Japan, the export license specified by the law is required for export.
2. Please contact our sales representatives or product engineers before using our products listed in this catalog for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property, or when intending to use one of our products for other applications than specified in this catalog.
   ① Aircraft equipment
   ② Aerospace equipment
   ③ Undersea equipment
   ④ Power plant equipment
   ⑤ Medical equipment
   ⑥ Transportation equipment (vehicles, trains, ships, etc.)
   ⑦ Traffic signal equipment
   ⑧ Disaster prevention / crime prevention equipment
   ⑨ Data-processing equipment
   ⑩ Application of similar complexity and/or reliability requirements to the applications listed in the above
3. Product specifications in this catalog are as of May 2001. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before your ordering. If there are any questions, please contact our sales representatives or product engineers.
4. Please read CAUTION and Notice in this catalog for safety. This catalog has only typical specifications. Therefore you are requested to approve our product specification or to transact the approval sheet for product specification, before your ordering.
5. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or third party's intellectual property rights and other related rights in consideration of your using our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.
6. None of ozone depleting substances (ODS) under the Montreal Protocol is used in manufacturing process of us.
