## Description

M/A-COM's DS55-0004 is an IC-based monolithic power divider using M/A-COM's GMIC technology in a low cost SOIC-16 plastic package. This 5-way power divider is ideally suited for applications where PCB real estate is at a premium and part count reduction and cost are critical. Typical applications include base station switching networks and other cellular equipment, including subscriber units. Available in tape and reel.

The DS55-0004 is fabricated using a passive-integrated circuit process. The process features full-chip passivation for increased performance and reliability.
