DS7820A/DS8820A Dual Line Receiver

General Description

The DS7820A and the DS8820A are improved performance digital line receivers with two completely independent units fabricated on a single silicon chip. Intended for use with digital systems connected by twisted pair lines, they have a differential input designed to reject large common mode signals while responding to small differential signals. The output is directly compatible with TTL or LS integrated circuits.

The response time can be controlled with an external capacitor to reject input noise spikes. The output state is a logic "1" for both inputs open. Termination resistors for the twisted pair line are also included in the circuit. Both the DS7820A and the DS8820A are specified, worst case, over their full

operating temperature range (-55°C to $+125^{\circ}\text{C}$ and 0°C to 70°C respectively), over the entire input voltage range, for $\pm 10\%$ supply voltage variations.

Features

- Operation from a single +5V logic supply
- Input voltage range of $\pm 15\text{V}$
- Strobe low forces output to "1" state
- High input resistance
- Fanout of ten with TTL integrated circuits
- Outputs can be wire OR'ed
- Series 54/74 compatible

Note 3: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. Except for "Operating Temperature Range" they are not meant to imply that the devices should be operated at these limits. The table of "Electrical Characteristics" provides conditions for actual device operation.

Note 4: These specifications apply for $4.5V \leq V_{CC} \leq 5.5V$, $-15V \leq V_{CM} \leq 15V$ and $-55^\circ C \leq T_A \leq +125^\circ C$ for the DS7820A or $4.75V \leq V_{CC} \leq 5.25V$, $0^\circ C \leq T_A \leq +70^\circ C$ for the DS8820A unless otherwise specified. Typical values given are for $V_{CC} = 5.0V$, $T_A = 25^\circ C$ and $V_{CM} = 0V$ unless stated differently.

Note 5: All currents into device pins shown as positive, out of device pins as negative, all voltages referenced to ground unless otherwise noted. All values shown as max or min on absolute value basis.

Note 6: Only one output at a time should be shorted.
