

# International IOR Rectifier

## REPETITIVE AVALANCHE AND $dv/dt$ RATED HEXFET<sup>®</sup> TRANSISTORS THRU-HOLE (TO-204AA/AE)

## IRF9140 100V, P-CHANNEL

### Product Summary

| Part Number | BVDSS | RDS(on) | Id   |
|-------------|-------|---------|------|
| IRF9140     | -100V | 0.2Ω    | -18A |

The HEXFET<sup>®</sup> technology is the key to International Rectifier's advanced line of power MOSFET transistors. The efficient geometry and unique processing of this latest "State of the Art" design achieves: very low on-state resistance combined with high transconductance; superior reverse energy and diode recovery  $dv/dt$  capability.

The HEXFET transistors also feature all of the well established advantages of MOSFETs such as voltage control, very fast switching, ease of paralleling and temperature stability of the electrical parameters.

They are well suited for applications such as switching power supplies, motor controls, inverters, choppers, audio amplifiers and high energy pulse circuits.

### Features:

- Repetitive Avalanche Ratings
- Dynamic  $dv/dt$  Rating
- Hermetically Sealed
- Simple Drive Requirements
- Ease of Paralleling

### Absolute Maximum Ratings

|  | Parameter                       |   | Units         |
|--|---------------------------------|---|---------------|
| $I_D$ @ $V_{GS} = 0V, T_C = 25^\circ C$  | Continuous Drain Current        | -18                                       | A             |
| $I_D$ @ $V_{GS} = 0V, T_C = 100^\circ C$ | Continuous Drain Current        | -11                                       |               |
| $I_{DM}$                                 | Pulsed Drain Current ①          | -72                                       |               |
| $P_D$ @ $T_C = 25^\circ C$               | Max. Power Dissipation          | 125                                       | W             |
|  | Linear Derating Factor          | 1.0                                       | W/ $^\circ C$ |
| $V_{GS}$                                 | Gate-to-Source Voltage          | $\pm 20$                                  | V             |
| EAS                                      | Single Pulse Avalanche Energy ② | 500                                       | mJ            |
| $I_{AR}$                                 | Avalanche Current ①             | -18                                       | A             |
| EAR                                      | Repetitive Avalanche Energy ①   | 12.5                                      | mJ            |
| $dv/dt$                                  | Peak Diode Recovery $dv/dt$ ③   | -5.5                                      | V/ns          |
| $T_J$                                    | Operating Junction              | -55 to 150                                | $^\circ C$    |
| $T_{STG}$                                | Storage Temperature Range       |   |               |
|  | Lead Temperature                | 300 (0.063 in. (1.6mm) from case for 10s) |               |
|  | Weight                          | 11.5(typical)                             | g             |

**Electrical Characteristics @ T<sub>j</sub> = 25°C (Unless Otherwise Specified)**

|                                     | Parameter                                    | Min  | Typ    | Max  | Units | Test Conditions   |

**Foot Notes:**

- ① Repetitive Rating; Pulse width limited by maximum junction temperature.
- ②  $V_{DD} = -25V$ , starting  $T_J = 25^{\circ}C$ ,  
Peak  $I_L = -18A$ ,
- ③  $I_{SD} \leq -18A$ ,  $di/dt \leq -100A/\mu s$ ,  
 $V_{DD} \leq -100V$ ,  $T_J \leq 150^{\circ}C$   
Suggested  $R_G = 9.1 \Omega$
- ④ Pulse width  $\leq 300 \mu s$ ; Duty Cycle  $\leq 2\%$
