

## PRECISION GENERAL-PURPOSE REGULATOR

### DESCRIPTION

This monolithic integrated circuit is a versatile, general-purpose voltage regulator designed as a substantially improved replacement for the popular SG723 device. The SG1532 series regulators retain all the versatility of the SG723 but have the added benefits of operation with input voltages as low as 4.5 volts and as high as 50 volts; a low noise, low voltage reference; temperature compensated, low threshold current limiting; and protective circuits which include thermal shutdown and independent current limiting of both the reference and output voltages. A separate remote shutdown terminal is included. In the dual-in-line package an open collector output is available for low input-output differential applications.

These devices are available in both hermetic 14-pin cerdip and 10-pin TO-96 packages. In the T-package, these units are interchangeable with the LAS-1000 and LAS-1100 regulators. The SG1532 is rated for operation over the ambient temperature range of -55°C to 125°C while the SG2532 and SG3532 are intended for industrial applications of 0°C to 70°C.

### FEATURES

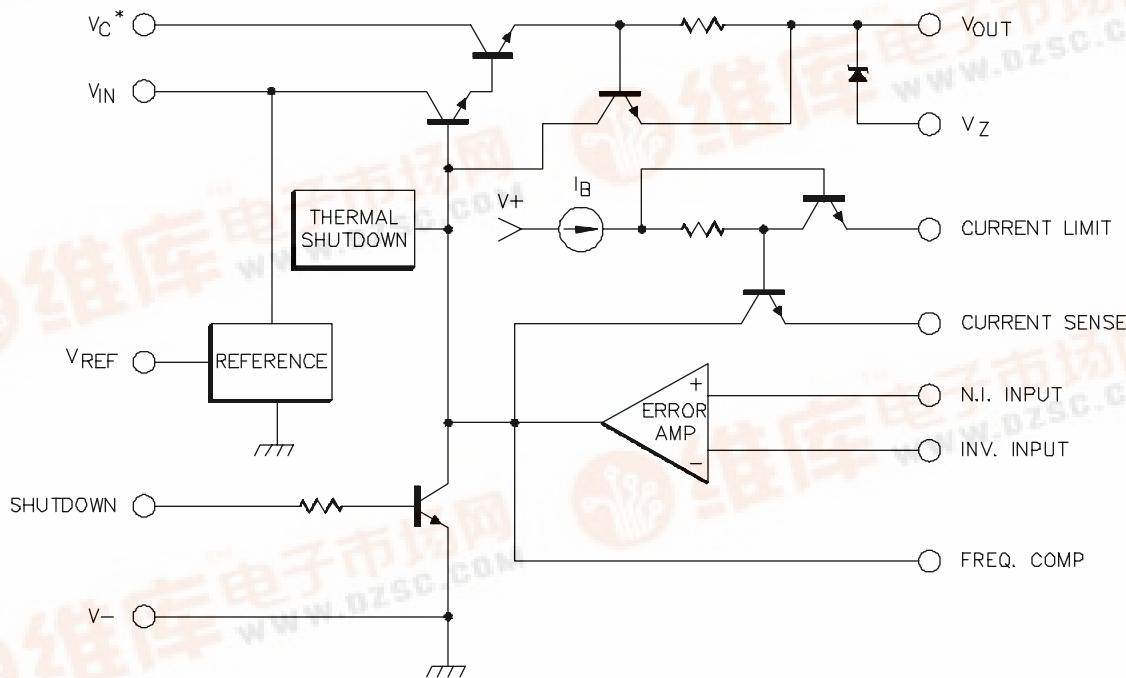

- Input voltage range of 4.5V to 50V
- 2.5V low noise reference
- Independent shutdown terminal
- Improved line and load regulation
- 80mV current limit sense voltage
- Fully protected including thermal shutdown
- Useful output current to 150mA

### HIGH RELIABILITY FEATURES

-SG1532

- ◆ Available to MIL-STD-883
- ◆ LMI level "S" processing available

### BLOCK DIAGRAM

\* V<sub>C</sub> IS INTERNALLY CONNECTED TO V<sub>IN</sub> FOR T PACKAGE

# SG1532/SG2532/SG3532

## ABSOLUTE MAXIMUM RATINGS (Note 1)

Pulse (50 ms) Input Voltage from $V_{IN}$ to $V_-$ .....	50V	Current from $V_{REF}$ .....	25mA
Continuous Input Voltage from $V_{IN}$ to $V_-$ .....	40V	Operating Junction Temperature	
Input to Output Voltage Differential.....	40V	Hermetic (T, J, L-Packages).....	150°C
Maximum Output Current .....	250mA	Storage Temperature Range .....	-65°C to 150°C
Current from $V_Z$ (J, L-Package only).....	100mA	Lead Temperature (Soldering, 10 Seconds) .....	300°C

Note 1. Exceeding these ratings could cause damage to the device.

## THERMAL DATA

J Package:

Thermal Resistance-Junction to Case, $\theta_{JC}$ .....	30°C/W
Thermal Resistance-Junction to Ambient, $\theta_{JA}$ .....	80°C/W

T Package:

Thermal Resistance-Junction to Case, $\theta_{JC}$ .....	25°C/W
Thermal Resistance-Junction to Ambient, $\theta_{JA}$ .....	130°C/W

L Package:

Thermal Resistance-Junction to Case, $\theta_{JC}$ .....	35°C/W
Thermal Resistance-Junction to Ambient, $\theta_{JA}$ .....	120°C/W

Note A. Junction Temperature Calculation:  $T_J = T_A + (P_D \times \theta_{JA})$ .  
 Note B. The above numbers for  $\theta_{JC}$  are maximums for the limiting thermal resistance of the package in a standard mounting configuration. The  $\theta_{JA}$  numbers are meant to be guidelines for the thermal performance of the device/pc-board system. All of the above assume no ambient airflow.

## RECOMMENDED OPERATING CONDITIONS (Note 2)

Input Voltage Range	Reference Current .....	5mA
SG1532/SG2532 .....	5V to 45V	
SG3532 .....	5V to 36V	
Output Current Range .....	1mA to 100mA	
Note 2. Range over which the device is functional.	Zener Current (J & L-Packages only) .....	20mA
	Operating Ambient Temperature Range	
	SG1532 .....	-55°C to 125°C
	SG2532/SG3532 .....	0°C to 70°C

## ELECTRICAL CHARACTERISTICS

(Unless otherwise specified, these specifications apply over the operating ambient temperatures for SG1532 with  $-55^\circ\text{C} \leq T_A \leq 125^\circ\text{C}$ , SG2532 with  $0^\circ\text{C} \leq T_A \leq 70^\circ\text{C}$ , SG3532 with  $0^\circ\text{C} \leq T_A \leq 70^\circ\text{C}$ ,  $V_{IN} = 10\text{V}$ ,  $V_{OUT} = 5\text{V}$ , and  $I_{OUT} = 1\text{mA}$ . Low duty cycle pulse testing techniques are used which maintains junction and case temperatures equal to the ambient temperature.)

Parameter	Test Conditions	SG1532/SG2532			SG3532			Units
		Min.	Typ.	Max.	Min.	Typ.	Max.	
Input Voltage Range	$T_A = 25^\circ\text{C}$	4.5		50	4.5		40	V

## APPLICATION INFORMATION

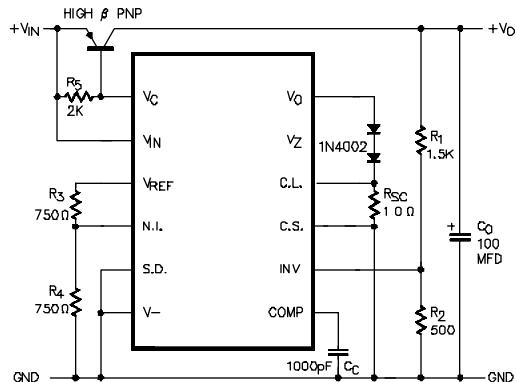

FIGURE 7 - 90% EFFICIENT LINEAR REGULATOR

Output Voltage = 5V  
Min ( $V_{IN} - V_{OUT}$ ) at 2A = 0.4V  
Load Reg 0-2A = 20mV

Max Output Current = 3A  
Line Reg 6-30V = 10 mV  
Load Reg 0-2A = 20mV

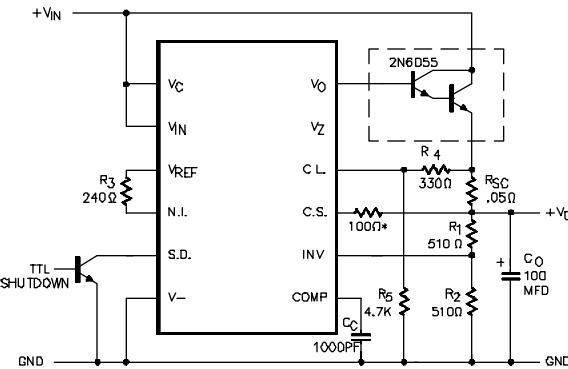

FIGURE 8 - HIGH CURRENT REGULATOR WITH FOLDBACK  
CURRENT LIMITING AND REMOTE SHUTDOWN

Output Voltage = 5V  
Max Output Current = 8A  
Min  $V_{IN}$  at No Load = 6.9V  
Min  $V_{IN}$  at 5A = 8.2V

Line Reg 10-30V = 3mV  
Load Reg 0-5A = 17mV  
Short Circuit Current = 1.8A

### Notes:

For output voltages above 8V and load currents which allow PNP base current to be limited to 25mA, the internal zener may be used, eliminating the need for the two external diodes and the divider on  $V_{REF}$ .

$R_{SC}$  can be eliminated if the 200mA current limit on  $V_{OUT}$  is adequate. Overall current limiting is dependent upon PNP Beta. For greater accuracy, load current may be sensed in the ground line.

### Note:

- \* 100Ω surge limiting resistor should be used for output voltages above 8V.

# SG1532/SG2532/SG3532
