#### DESCRIPTION

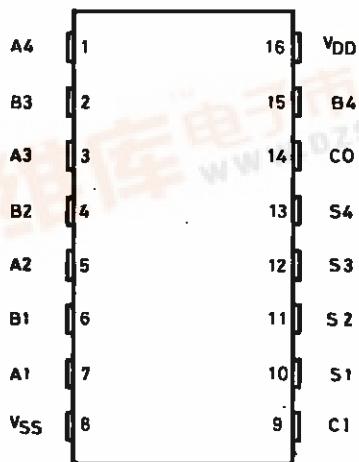

The HCC4008B (extended temperature range) and HCF4008B (intermediate temperature range) are monolithic integrated circuits, available in 16-lead dual in-line plastic or ceramic package and plastic micropackage.

The HCC/HCF4008B types consist of four full adder stages with fast look ahead carry provision from stage to stage. Circuitry is included to provide a fast "parallel-carry-out" to permit high-speed operation in arithmetic sections using several HCC/HCF 4008B's.

**HCC/HCF4008B** inputs include the four sets of bits to be added, A<sub>1</sub> to A<sub>4</sub> and B<sub>1</sub> to B<sub>4</sub>, in addition to the "Carry In" bit from a previous section.

**HCC/HCF4008B** outputs include the four sum bits, S<sub>1</sub> to S<sub>4</sub>. In addition to the high speed "parallel-carry-out" which may be utilized at a succeeding HCC/HCF4008B section.
