

HD74AC164/HD74ACT164

Serial-In, Parallel-Out Shift Register

HITACHI

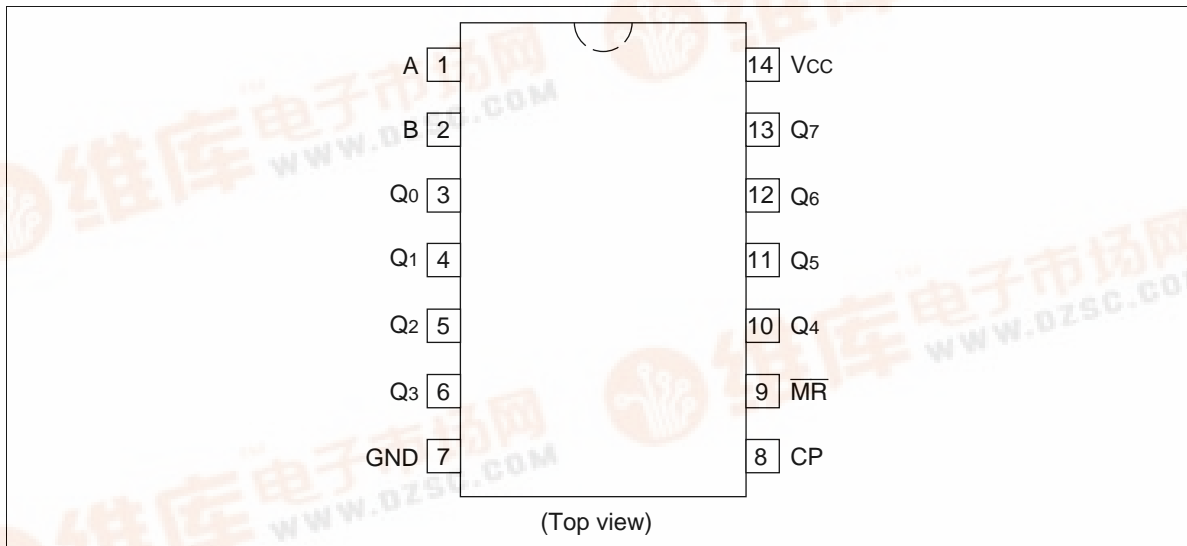

Description

The HD74AC164/HD74ACT164 is a high-speed 8-bit serial-in/parallel-out shift register. Serial data is entered through a 2-input AND gate synchronous with the Low-to-High transition of the clock. The device features an asynchronous Master Reset which clears the register, setting all outputs Low independent of the clock.

Features

- Outputs Source/Sink 24 mA
- HD74ACT164 has TTL-Compatible Inputs

Pin Arrangement

HD74AC164/HD74ACT164

Logic Symbol

Pin Names

A, B	Data Inputs
CP	Clock Pulse Input (Active Rising Edge)
$\overline{\text{MR}}$	Master Reset Input (Active Low)
Q ₀ to Q ₇	Outputs

Functional Description

The HD74AC164/HD74ACT164 is an edge-triggered 8-bit shift register with serial data entry and an output from each of the eight stages. Data is entered serially through one of two inputs (A or B); either of these inputs can be used as an active High Enable for data entry through the other inputs. An unused input must be tied High.

Each Low-to-High transition on the Clock (CP) input shifts data one place to the right and enters into Q₀ the logical AND of the two data inputs (A•B) that existed before the rising clock edge. A Low level on the Master Reset ($\overline{\text{MR}}$) input overrides all other inputs and clears the register asynchronously, forcing all Q outputs Low.

HD74AC164/HD74ACT164

Mode Select Table

Operating Mode	Inputs			Outputs	
	$\overline{\text{MR}}$	A	B	Q_0	Q_1 to Q_7
Reset (Clear)	L	X	X	L	L to L
Shift	H	L	L	L	q_0 to q_6
	H	L	H	L	q_0 to q_6
	H	H	L	L	q_0 to q_6
	H	H	H	H	q_0 to q_6

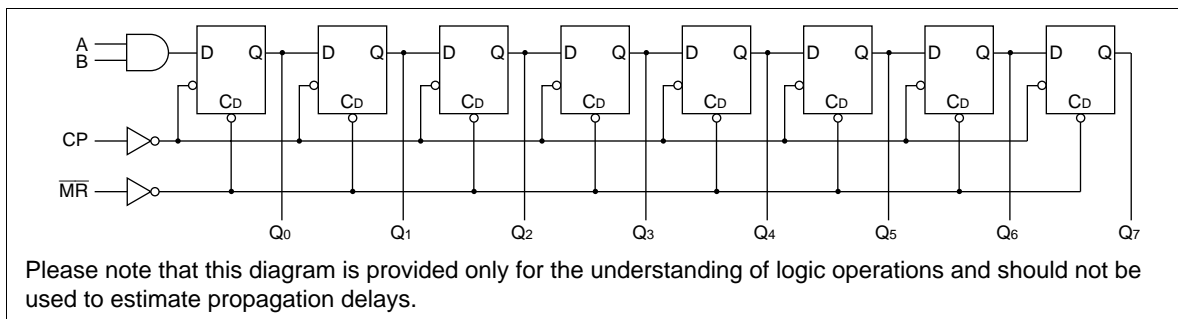

H : High Voltage Level

L : Low Voltage Level

X : Immaterial

q_n : Lower case letters indicate the state of the referenced input or output one setup time prior to the Low-to-High clock transition.

Logic Diagram

DC Characteristics (unless otherwise specified)

Item	Symbol	Max	Unit	Condition
Maximum quiescent supply current	I_{CC}	80	μA	$V_{IN} = V_{CC}$ or ground, $V_{CC} = 5.5 \text{ V}$, $T_a = \text{Worst case}$
Maximum quiescent supply current	I_{CC}	8.0	μA	$V_{IN} = V_{CC}$ or ground, $V_{CC} = 5.5 \text{ V}$, $T_a = 25^\circ\text{C}$
Maximum additional I_{CC} /input (HD74ACT164)	I_{CCT}	1.5	mA	$V_{IN} = V_{CC} - 2.1 \text{ V}$, $V_{CC} = 5.5 \text{ V}$, $T_a = \text{Worst case}$

Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
