Product Data Sheet

1.0 WATT UNREGULATED SIP DC/DC CONVERTER

HPR10XX

DESCRIPTION

The HPR10XX Series uses advanced circuit design and packaging technology to deliver superior reliability and performance. A 170kHz push-pull oscillator is used in the input stage. Beat-frequency oscillation problems are reduced when using the HPR10XX Series with high frequency isolation amplifiers.

Reduced parts count and high efficiency add to the reliability of the HPR10XX Series. The high efficiency of the HPR10XX Series means less internal power dissipation, as low as 190mW. With reduced heat dissipation the HPR10XX Series can operate at higher temperatures with no degradation. In addition, the high efficiency of the HPR10XX Series means the series is able to offer greater than 13 W/inch³ of output power density. Operation down to no load will not impact the reliability of the series, although a 1mA minimum load is needed to realize published specifications.

The HPR10XX Series provides the user low cost without sacrificing reliability. The use of surface mounted devices and advanced manufacturing technologies make it possible to offer premium performance and low cost.

FEATURES

- LOW COST
- SINGLE-IN-LINE PACKAGE (SIP)
- INTERNAL INPUT AND OUTPUT FILTERING
- NON-CONDUCTIVE CASE
- HIGH OUTPUT POWER DENSITY:
13 WATTS/INCH³
- EXTENDED TEMPERATURE RANGE:
-25°C TO +65°C
- HIGH EFFICIENCY: TO 72% TYPICAL

TYPICAL PERFORMANCE CURVES

Specifications typical at $T_A = +25^\circ\text{C}$, nominal input voltage, rated output current unless otherwise specified.

SAFE OPERATING AREA

NOTES:

- 1.) When operated within the SAFE OPERATING AREA as defined by the above curves, the output voltage of HPR10XX devices is guaranteed to be within 95% of its steady-state value within 100 milliseconds after the input voltage has reached 95% of its steady-state value.
- 2.) For dual output models, total load capacitance is the sum of the capacitances on the plus and minus outputs.

ORDERING INFORMATION

	HPR	10XX	/H
Device Family _____			
HPR Indicates DC/DC Converter			
Model Number _____			
Selected from Table of Electrical Characteristics			
Screening Option _____			

ABSOLUTE MAXIMUM RATINGS

Internal Power Dissipation.....	490mW
Short Circuit Duration.....	Momentary
Lead Temperature (soldering, 10 seconds max).....	+300°C
