

# NIKO-SEM 0.8A Fixed and Adjustable Low Dropout Linear Regulator (LDO) L1087 Series SOT-89,TO-92

## GENERAL DESCRIPTION

The L1087 Series are positive and low dropout three-terminal voltage regulators with 0.8A output current capability. These devices are designed for use in low voltage applications that offers lower dropout voltage and faster transient response.

These devices are fully protected against over current faults, over temperature operation, reversed input polarity, reversed lead insertion, transient voltage spike ...etc.

On-Chips trimming the reference voltage to 1% and features the low dropout of maximum 1.45 volts.

The L1087 Series regulators offer fixed and adjustable voltage options available in the space saving SOT-89 & TO-92 package.

## FEATURES
